## MANDRINI - INTRODUZIONE

Serinex produce mandrini TC-SK DIN69871, BT-MAS403, ISO DIN2080, CILINDRICI, HSK-DIN69893, CAPTO POLIGONALE ISO26623-1, ADATTATORI VARILOCK, PORTA ALESATORI OSCILLANTI, MANDRINI TCL PER LEGNO E ALLUMINIO E MANDRINI SPECIALI SU RICHIESTA.

Tutti i mandrini sono prodotti con un elevato standard qualitativo per una massima sicurezza operativa.

Abbiamo un'unità produttiva dedicata alla produzione di mandrini nei più diffusi standard internazionali, dotata di macchinari CNC di ultima generazione, con i più severi controlli di produzione in ottemperanza alle procedure dettate dalla certificazione ISO 9001: 2008. Per la nostra produzione utilizziamo soltanto barre di acciai legati di altissima qualità provenienti da acciaierie qualificate, fornite con certificati di qualità e controllate singolarmente con unità di controllo ad "ultrasuoni" per scongiurare difetti interni del materiale come cricche o microlesioni. Tutte le lavorazioni meccaniche sono eseguite nella nostra moderna unità produttiva di Annone Brianza, situata a breve distanza da Lecco, in un comparto di oltre 7000 mq. dotato di un ampio parco macchine con una produzione giornaliera elevata. Il nostro ufficio tecnico è in grado di fornire una consulenza specifica per la messa in produzione di "mandrini speciali" dalle particolari forme e caratteristiche per soddisfare tutte le esigenze dei nostri clienti.

### PORAUTENSILI BILANCIATI

I portautensili bilanciati sono l'ideale per equipaggiare l'ultima generazione di macchine utensili ad alta velocità e per l'ottenimento delle migliori prestazioni e finiture superficiali. Tutti i portautensili presenti nel catalogo possono essere bilanciati. A tale scopo abbiamo a disposizione bilanciatrici qualificate che ci permettono di soddisfare ogni esigenza di equilibratura.

Prevediamo due diversi classi di equilibratura:

- \* grado G 2,5 con tolleranza più stretta;
- \* grado G 6,3 con tolleranza maggiore e diverse

Classi di velocità di rotazione:

- 10.000 RPM
- 15.000 RPM
- 20.000 RPM
- 30.000 RPM

### CLASSIFICAZIONE DEI ROTORI, GRADI DI EQUILIBRATURA - GRADO G mm/s

**G 0.4:** giroscopi, mandrini dischi e indotti di rettifiche di alta precisione;

**G1.0:** indotti di piccoli motori veloci con elevate esigenze di equilibratura, azionamenti di rettifiche di alta precisione, rotorì di turbine di motori molto veloci.

**G2.5:** rotorì di turbine a vapore e a gas, turbopompe turboalternatori, turbosoffianti, turbine di propulsione navi mercantili. Indotti di motori medi e grandi con elevate esigenze di equilibratura. Azionamenti di macchine utensili, ingranaggi veloci di riduttori.

**G6.3:** indotti di piccoli motori elettrici prodotti in serie in applicazioni non sensibili alle vibrazioni, macchine utensili e parti di macchine utensili in generali. Parti veloci di macchine operatrici, ceste di centrifughe, rotorì di macchine idrauliche, volani, ventilatori, pompe, ingranaggi di riduttori.

**G16:** alberi di trasmissione, alberi cardanici con elevate esigenze di equilibratura, parti di macchine agricole. Parti di motore per vetture, autocarri, locomotori a benzina o diesel. Cerchi di ruote per autovetture e motocicli.

### ATTENZIONE / ATTENTION

# MANDRINI COLLET CHUCKS

## COLLET CHUCKS - INTRODUCTION

Serinex produces adapters TC-SK DIN69871, BT-MAS403, ISO DIN2080, STRAIGHT SHANK, HSK-DIN69893, CAPTO MODULARS TOOLS, TOOL HOLDERS FOR VARILOCK SYSTEM, FLOATING REAMER HOLDERS, TOOLHOLDERS TCL SUITABLE FOR WOOD AND ALUWORKING MACHINES E SPECIAL TOOLHOLDERS.

Every adapter is produced following a high-qualitative standard to pursue maximum operative safety. We have a productive unit dedicated to adapters production supplied with last generation CNC machines, with all the most severe production controls, following the norm of the certification ISO 9001: 2008. For our production we only use high-quality steel bar, produced in qualified steel plant, provided with quality certifications and individually controlled with ultrasounds in order to avoid internal deficiency of the material. Furthermore all our production of tool holders undergoes a specific heat-treatment to obtain superior quality of RESISTANCE and RESILIENCE.. All the mechanical workings are performed in our modern division in Annone Brianza, not far from Lecco, in a place of more than 7000 mq., supplied with a wide rolling stock with a high daily production. Our technical office can provide expert advice for the production of "special toolholders" with specific characteristics, in order to satisfy the desires of our clients.

### BALANCED BROACH HOLDER

Balanced tool holders are the best way to equip the latest generation of high speed machines tools and to obtain better results and superficial finishings.

Every BALANCED BROACH HOLDER in the catalogue can be balanced. For this purpose there are machines which allows us to satisfy balancing necessities.

We provide for two different classes of balancing:

\* degree G 2,5 with tight tolerance

\* degree G 6,3 with different and higher tolerance

Classes of speed rotation:

10.000 RPM

15.000 RPM

20.000 RPM

30.000 RPM

### ROTORS CLASSIFICATION, BALANCING DEGREE – DEGREE G mm/s

G 0.4: adapters disks and adjustment high precision rotor

G1.0: rotors of small motors with balancing needs, high precision adjutment. Turbine high speed rotors.

G2.5: Turbine rotors, both steam and gas, turbo-pomp, turbo-blowing,propulsion turbines for mercantile ships. Medium motor rotors with high balancing needs. Activation of tools machines, high speeds gears of adapters.

G6.3: Small electric motors rotors, produced in applications non perceptible to vibrations, tools machines and in general parts of tools machines.

High speed part of operatives machines, spin cycles. Hydraulic machines rotors, fly-wheels, fans, pomps, adaptors gears

G16: Transmission shafts, cardan shafts with strong balancing needs, parts of farming machines. Parts of engine for vehicles, lorries, petrol and diesel locomotives. Wheels for cars and motocycles.

### AVERTISSEMENT / WARNUNG

# MANDRINI MANDRIN

## MANDRIN - INTRODUCTION

Serinex produit des mandrins TC-SK DIN69871, BT-MAS403, ISO DIN2080, MANDRIN CYLINDRIQUE, HSK-DIN69893, PORTE-Outils POUR SYSTEME MODULAIRE CAPOT, ADAPTATEUR FOR VARILOCK SYSTEM, MANDRIN FLOTTANT, MANDRIN TCL POUR BOIS ET ALUMINIUM ET MANDRIN SPECIAL. Tous les mandrins sont produits avec un standard de qualité très élevé pour une sécurité opérationnelle maximale. Nous avons une unité de production dédiée à la production de mandrins (mandrin porte pinces, mandrin pour fraises, mandrins pour fraiseuses) selon les standards internationaux les plus utilisés et dotée de machines à CN de dernière génération, avec les contrôles les plus sévères, respectant les procédures dictées par la certification ISO 9001: 2008. Nous utilisons pour la production des barres d'alliage d'acier de très haute qualité provenant d'aciéries qualifiées, fournies avec certificat de qualité et soumises à une unité de contrôle à "ultrasons" pour éviter les défauts internes du matériel telles les fissures les micro lésions. En outre, toute notre production de subit un traitement thermique spécifique pour obtenir une meilleure qualité de résistance et résilience du produit fini. Toutes les fabrications mécaniques de mandrin pour fraises, mandrins porte pinces, mandrin porte-fraises et mandrins pour fraiseuses, sont effectuées au sein de notre unité moderne de production d'Annone Brianza, sise à une brève distance de Lecco, dans un compartiment de plus de 7000 m<sup>2</sup>, doté d'un ample parc de machines avec une production journalière élevée. Notre bureau technique est en mesure de fournir des conseils spécifiques pour la mise en production de « mandrins spéciaux » à caractéristiques ou formes particulières pour satisfaire toutes les exigences de nos clients.

### PORTE-Outils EQUILIBRES

Les porte-outils équilibrés sont l'idéal pour équiper la dernière génération de machines-outils à grande vitesse et pour l'obtention de meilleures prestations et finitions de surfaces. Tous les porte-outils présents sur le catalogue peuvent être équilibrés. Nous possédons pour cela une équilibreruse qui nous permet de satisfaire toutes exigences d'équilibrage.

On prévoit deux classes diverses d'équilibrage:

- Degrés G2,5 avec tolérance étroite
- Degrés G6,3 avec tolérance majeure et différente.

Classes de vitesse de rotation :

10.000 RPM

15.000 RPM

20.000 RPM

30.000 RPM

### CLASSIFICATION DES ROTORS, DEGRES D'EQUILIBRAGE - DEGRES G mm/s

G 0.4: Gyroscopes, mandrins disques et inducteurs de rectifieuses à haute précision;

G1.0: Inducteurs de petit moteur rapide avec des exigences d'équilibrage élevées, entraînements de rectifieuses à haute précision. Rotor de turbines de moteurs très rapides.

G2.5: Rotors de turbines à vapeur et à gaz, turbopompes, turbo-alternateurs, turbo-souffleurs, turbine de propulsion de navires marchands. Inducteurs de moteur moyen et grand avec des exigences d'équilibrage élevées. Entraînements de machines-outils, engrenages rapides de réducteurs.

G6.3: Inducteurs de petits moteurs électriques produits en série en applications non sensibles aux vibrations, machines-outils et pièces de machines-outils en général. Pièces rapides d'engins d'exploitations, récipients pour centrifugeuse, rotors de machines hydrauliques, volants d'inertie, ventilateurs, pompes, engrenages de réducteurs.

G16: Arbres de transmission, arbres de cardans avec des exigences d'équilibrage élevées, pièces pour machines agricoles. Pièces de moteur pour véhicules, camions, locomotives à essence ou gasoil. Jantes de roues pour véhicules et motocycle.

### ATTENZIONE / ATTENTION

# MANDRINI SPANNFUTTER

## SPANNFUTTER - EINFÜHRUNG

Serinex produziert alle Sorten Spannfutter: TC-TCB, BT-BTB, ISO, ZYLINDRISCHE, HSK (Spannfutter für Fräser, Spannzangenhalter, zylindrische Spannzangenhalter, Spannzangenfutter, Spannfutter für Fräsmaschinen, Hülsen für Morsekonus). Alle Spannfutter sind mit einem Qualitätsstandard für die höchste Betriebssicherheit hergestellt. Wir verfügen über eine Abteilung für die Herstellung von Spannfuttern (Spannfutter für Fräser, Spannzangenhalter, Spannfutter für Fräsmaschinen) in den verbreitesten internationalen Standards; diese Abteilung ist mit den modernsten CNC Maschinen und den sorgfältigsten Produktionskontrollen unter Beachtung der Vorgänge der ISO 9001:2000 Zertifikation ausgestattet. Für unsere Produktion verwenden wir nur legierte Stähle höher Qualität (16NiCr4), die aus qualifizierten Stahlwerken kommen, mit Qualitätszertifikaten geliefert und mit Ultraschall-Prüfeinheiten einzeln kontrolliert werden, um innere Fehler wie Risse oder Mikrobeschädigungen abzuwenden. Zudem erfährt unsere ganze Produktion von Spannfuttern TC-TCB, BT-BTB, ISO, ZYLINDRISCHE, HSK (Spannfutter für Fräser, Spannzangenhalter, Spannfutter für Fräsmaschinen, Hülsen für Morsekonus) eine spezifische Wärmebehandlung, um die beste Eigenschaften von FESTIGKEIT und KERBSCHLAGZÄHIGKEIT des Endprodukts zu erzielen. Unser Büro für Betriebstechnik kann eine individuelle Beratung für die Produktion von speziellen Spannfuttern mit besonderen Eigenschaften oder Gestalten bieten, um alle Anforderungen unserer Kunden zu befriedigen.

### AUSWUCHTETE WERKZEUGSPANNER

Die auswuchteten Werkzeugspanner sind die beste Lösung, um die modernsten Hochgeschwindigkeitswerkzeugmaschinen auszurüsten, und um die besten Leistungen und oberflächliche Feinbearbeitungen zu erzielen. Alle Werkzeugspanner des Katalogs können auswuchtet werden. Dazu verfügen wir über eine CEMB – Auswuchtmaschine, durch die wir alle Bedürfnisse nachdem Auswuchten befriedigen können.

Wir bieten zwei verschiedene Auswuchtenklassen an:

- \* Grad G 2,5 mit engerer Toleranz
- \* Grad G 6.3 mit verschiedener und höher Toleranz

Drehgeschwindigkeitsklassen:

- \* 10.000 RPM
- \* 15.000 RPM
- \* 20.000 RPM
- \* 30.000 RPM

### KLASSIFIZIERUNG DER ROTOREN, AUSWUCHTSGRADE – GRAD G mm/s

G 0.4: Gyroskope, Disk-Futter und Rotoren von Schleifmaschinen hoher Genauigkeit;

G 1.0: Rotoren von kleinen geschwinden Motoren mit hohen Auswuchtbedürfnissen, Antriebe von hochgenauen Schleifmaschinen, Turbinenrotoren von Hochgeschwindigkeitsmotoren.

G 2.5: Rotoren von Gas-Dampfturbinen, Turbopumpen, Turbo-Wechselstromgeneratoren, Turbo-Verdichtern, Antriebsturbinen für Handelsschiffen. Rotoren von mittleren und großen Motoren mit hohen Auswuchtbedürfnissen. Antriebe von Werkzeugmaschinen, schnelle Getriebe von Unterzugsgetrieben.

G 6.3: Rotoren von kleinen elektrischen Motoren, die in Serien mit vibrationsbeständigem Einbau erzeugt werden, Werkzeugmaschinen und Komponenten für Werkzeugmaschinen. Hochgeschwindigkeitskomponente von Baumaschinen, Zentrifugenkörpern, Rotoren von hydraulischen Maschinen, Schwungrädern, Lüftern, Pumpen, Getriebe von Unterzugsgetrieben.

G 16: Antriebswellen, Gelenkwellen mit hohen Auswuchtbedürfnissen, Komponenten von Landmaschinen. Komponenten von Motoren für Diesel- bzw. Benzinzugswagen, Fahrzeuge, Lastwagen. Radfelgen für Fahrzeuge und Krafträder.

## CARATTERISTICHE / SPECIFICATION / CARACTÉRISTIQUES/ TECHNISCHE DATEN

### CARATTERISTICHE TECNICHE

- Costruiti in acciaio certificato in barre.
- Eseguiti trattamenti termici da fornitori certificati ISO 9001.
- Rettificati di precisione esternamente, internamente e nelle filettature delle ghiere chiudipinza.
- Controllati con strumenti di misura certificati.
- La tolleranza di precisione dei coni ISO è AT2.
- L' errore di concentricità massimo tra il cono e la sede utensile è di 0.003mm.

### CARACTÉRISTIQUES

- Fabriqués en bar d'acier certifié .
- Réalisation du traitement thermique par des fournisseurs certifiés ISO 9001.
- Rectification de précision extérieurement, intérieurement et dans les filetages des écrous serre-pince.
- Contrôlés par des instruments de mesure certifiés.
- La tolérance de précision des cônes ISO est AT2.
- L'erreur de concentricité maximum entre le cône et le siège de l'outil est de 0.003 mm.

### TECHNICAL FEATURES

- Manufactured with certificate steel.
- Heat treatments are performed by certified suppliers ISO 9001.
- Precision ground on shanks, inside tapers and collet nut threads.
- Tested with high precision inspection and ganging equipment.
- Taper accuracy of ISO SHANKS lower than AT2.
- The maximum error of concentricity between the cone and the seat of tool is 0.003mm.

### MERKMALE

- Gebaut aus zertifiziertem Stabstahl
- Warmbehandlungen von Lieferanten mit Zeugnis ISO 9001
- Genauigkeitsgeschliffen aussen, innen und in den Gewinden der Spannmutter für den Zangenverschluss
- Geprüft mit zertifizierten Messinstrumenten
- Die Präzisionstolleranz der Konen ISO ist AT2
- Die max konzentrische Abweichung zwischen Konus und Werkzeugsitz ist 0.003 mm

## ISTRUZIONI / INSTRUCTIONS / INSTRUCTIONS ET QUOTTES / ANWEISUNGEN

### ISTRUZIONI

- I mandrini vengono forniti in forma ad o ad/b. nel caso dell'ad/b, il lubrificante passa dai fori presenti sulla flangia. L'operatore dovrà togliere le viti di chiusura che troverà già montate sul mandrino.

### INSTRUCTIONS:

- Les mandrins doivent être fournis en forme AD ou AD/B. pour l'AD/B, le lubrifiant passe par les trous présents sur La flange. L'opérateur doit enlever les vis de fermeture qu'il trouvera déjà monté sur le mandrin.

### INSTRUCTIONS

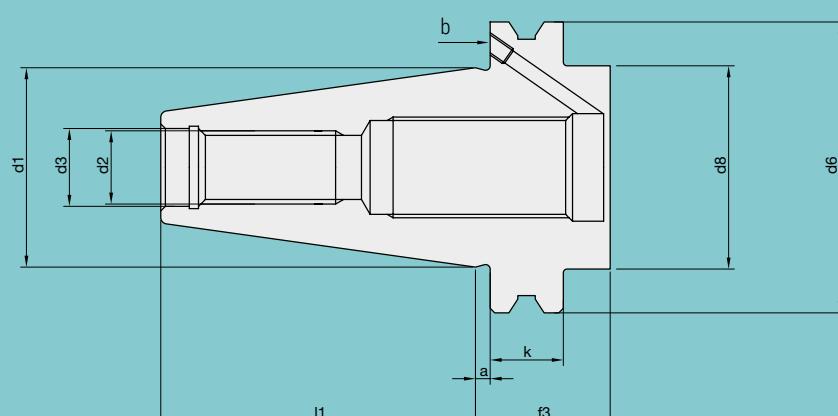

- The tool holders are provided to form ad or ad/b. in case of ad/b, the lubricant pass from holes on the flange.  
The operator will have to remove screw closure that he will find on the flange.

### TECHNISCHE DATEN

- Die Spannfutter werden in der form AD oder AD/B geliefert  
Im falle von AD/B, fliesst der Schmierstoff durch die vorhandenen Bohrungen auf der Flansche

# CARATTERISTICHE / SPECIFICATION / CARACTÉRISTIQUES/ TECHNISCHE DATEN

## CARATTERISTICHE TECNICHE

- Costruiti in acciaio certificato in barre.
- Eseguiti trattamenti termici da fornitori certificati ISO 9001.
- Rettificati di precisione esternamente, internamente e nelle filettature delle ghiere chiudipinza.
- Controllati con strumenti di misura certificati.
- La tolleranza di precisione dei coni ISO è AT2.
- L'errore di concentricità massimo tra il cono e la sede utensile è di 0.003mm.

## TECHNICAL FEATURES

- Manufactured with certificate steel.
- Heat treatments are performed by certified suppliers ISO 9001.
- Precision ground on shanks, inside tapers and collet nut threads.
- Tested with high precision inspection and ganging equipment.
- Taper accuracy of ISO SHANKS lower than AT2.
- The maximum error of concentricity between the cone and the seat of tool is 0.003mm.

## CARACTÉRISTIQUES

- Fabriqués en bar d'acier certifié.
- Réalisation du traitement thermique par des fournisseurs certifiés ISO 9001.
- Rectification de précision extérieurement, intérieurement et dans les filetages des écrous serre-pince.
- Contrôlés par des instruments de mesure certifiés.
- La tolérance de précision des cônes ISO est AT2.
- L'erreur de concentricité maximum entre le cône et le siège de l'outil est de 0.003 mm.

## MERKMALE

- Gebaut aus zertifiziertem Stabstahl
- Warmbehandlungen von Lieferanten mit Zeugnis ISO 9001
- Genaugkeitsgeschliffen aussen, innen und in den Gewinden der Spannmutter für den Zangenverschluss
- Geprüft mit zertifizierten Messinstrumenten
- Die Präzisionstolleranz der Konen ISO ist AT2
- Die max konzentrische Abweichung zwischen Konus und Werkzeugsitz ist 0.003 mm

# ISTRUZIONI / INSTRUCTIONS / INSTRUCTIONS ET QUOTTES / ANWEISUNGEN

## ISTRUZIONI

- I mandrini vengono forniti in forma ad o ad/b. nel caso dell'ad/b, il lubrificante passa dai fori presenti sulla flangia. L'operatore dovrà togliere le viti di chiusura che troverà già montate sul mandrino.

## INSTRUCTIONS

- The tool holders are provided to form ad or ad/b. in case of ad/b, the lubricant pass from holes on the flange.  
The operator will have to remove screw closure that he will find on the flange.

## INSTRUCTIONS

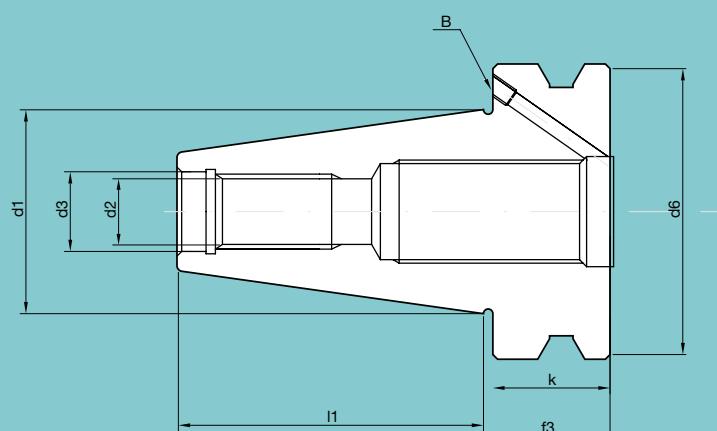

- Les mandrins doivent être fournis en forme AD ou AD/B. pour l'AD/B, Le lubrifiant passe par les trous présents sur la flange. L'opérateur doit enlever les vis de fermeture qu'il trouvera déjà monté sur le mandrin.

## ANWEISUNGEN UND ABMESSUNGEN

- Die Spannfutter werden in der form AD oder AD/B geliefert  
Im falle von AD/B, fliesst der Schmierstoff durch die vorhandenen Bohrungen auf der Flansche.

# CARATTERISTICHE / SPECIFICATION / CARACTÉRISTIQUES/ TECHNISCHE DATEN

## CARATTERISTICHE TECNICHE

- Costruiti in acciaio certificato in barre.
- Eseguiti trattamenti termici da fornitori certificati ISO 9001.
- Rettificati di precisione esternamente, internamente e nelle filettature delle ghiere chiudipinza.
- Controllati con strumenti di misura certificati.
- La tolleranza di precisione dei coni HSK-A è AT2.
- L'errore di concentricità massimo tra il cono e la sede utensile è 0.003 mm.

## CARACTÉRISTIQUES

- Fabriqués en bar d'acier certifié.
- Réalisation du traitement thermique par des fournisseurs certifiés ISO 9001.
- Rectification de précision extérieurement, intérieurement et dans les filetages des écrous serre-pince.
- Contrôlés par des instruments de mesure certifiés.
- La tolérance de précision des cônes HSK-A est AT2.
- L'erreur de concentricité maximum entre le cône et le siège de l'outil est de 0.003 mm.

## TECHNICAL FEATURES

- Manufactured with certificate steel.*
- Heat treatments are performed by certified suppliers ISO 9001.*
- Precision ground on shank, inside tapers and collet nut threads.*
- Tested with high precision inspection and gaging equipment.*
- Taper accuracy of HSK-A shanks lower than AT2.*
- The maximum error of concentricity between the cone and the seat of tool is 0.003 mm.*

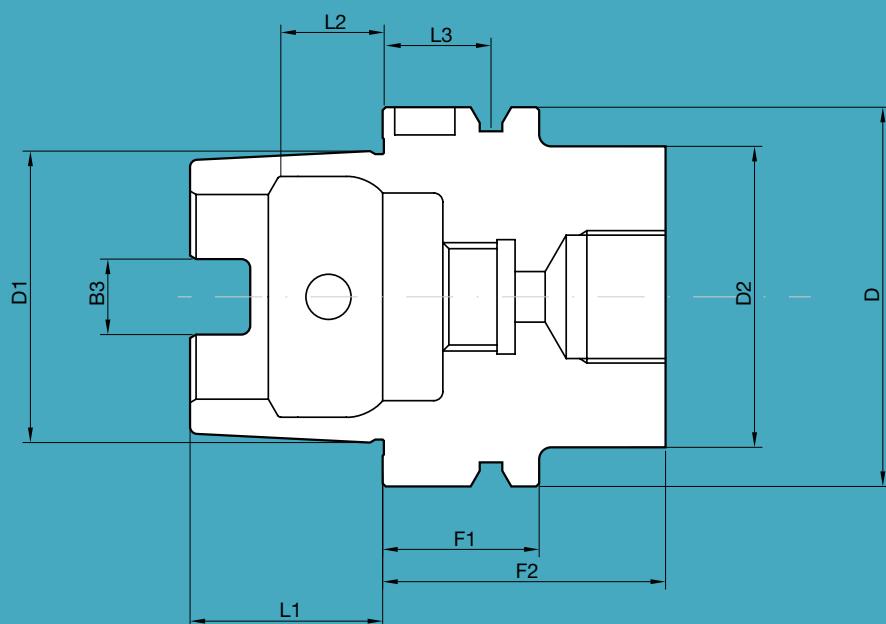

## MERKMALE

- Gebaut aus zertifiziertem Stabstahl*
- Warmbehandlungen von Lieferanten mit Zeugnis ISO 9001*
- Genauigkeitsgeschliffen aussen, innen und in den Gewinden der Spannmutter für den Zangenverschluss*
- Geprüft mit zertifizierten Messinstrumenten*
- Die Präzisionstolleranz der Konen HSK-A ist AT2*
- Die max konzentrische Abweichung zwischen Konus und Werkzeugsitz ist 0.003 mm*

# CARATTERISTICHE / SPECIFICATION / CARACTÉRISTIQUES/ TECHNISCHE DATEN

## CARATTERISTICHE TECNICHE

- Costruiti in acciaio certificato in barre.
- Eseguiti trattamenti termici da fornitori certificati ISO 9001.
- Rettificati di precisione esternamente, internamente e nelle filettature delle ghiere chiudipinza.
- Controllati con strumenti di misura certificati.
- La tolleranza di precisione dei coni HSK-C è AT2.
- L'errore di concentricità massimo tra il cono e la sede utensile è 0.003 mm.

## TECHNICAL FEATURES

- Manufactured with certificate steel.
- Heat treatments are performed by certified suppliers ISO 9001.
- Precision ground on shank, inside tapers and collet nut threads.
- Tested with high precision inspection and ganging equipment.
- Taper accuracy of HSK-C shanks lower than AT2.
- The maximum error of concentricity between the cone and the seat of tool is 0.003 mm.

## CARACTÉRISTIQUES

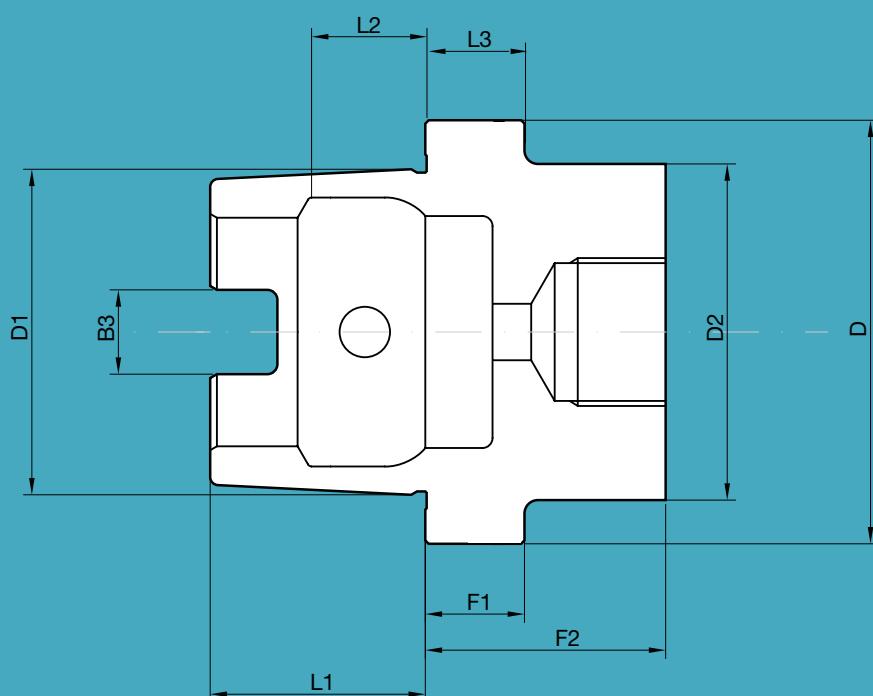

- Fabriqués en bar d'acier certifié.
- Réalisation du traitement thermique par des fournisseurs certifiés ISO 9001.
- Rectification de précision extérieurement, intérieurement et dans les filetages des écrous serre-pince.
- Contrôlés par des instruments de mesure certifiés.
- La tolérance de précision des cônes HSK-C est AT2.
- L'erreur de concentricité maximum entre le cône et le siège de l'outil est de 0.003 mm.

## MERKMALE

- Gebaut aus zertifiziertem Stabstahl
- Warmbehandlungen von Lieferanten mit Zeugnis ISO 9001
- Genaugkeitsgeschliffen aussen, innen und in den Gewinden der Spannmutter für den Zangenverschluss
- Geprüft mit zertifizierten Messinstrumenten
- Die Präzisionstolleranz der Konen HSK-C ist AT2
- Die max konzentrische Abweichung zwischen Konus und Werkzeugsitz ist 0.003 mm

# CARATTERISTICHE / SPECIFICATION / CARACTÉRISTIQUES/ TECHNISCHE DATEN

## CARATTERISTICHE TECNICHE

- Costruiti in acciaio certificato in barre.
- Eseguiti trattamenti termici da fornitori certificati ISO 9001.
- Rettificati di precisione esternamente, internamente e nelle filettature delle ghiere chiudipinza.
- Controllati con strumenti di misura certificati.
- La tolleranza di precisione dei coni HSK-F è AT2.
- L'errore di concentricità massimo tra il cono e la sede utensile è 0.003 mm.

## TECHNICAL FEATURES

- Manufactured with certificate steel.
- Heat treatments are performed by certified suppliers ISO 9001.
- Precision ground on shank, inside tapers and collet nut threads.
- Tested with high precision inspection and ganging equipment.
- Taper accuracy of HSK-F shanks lower than AT2.
- The maximum error of concentricity between the cone and the seat of tool is 0.003 mm.

## CARACTÉRISTIQUES

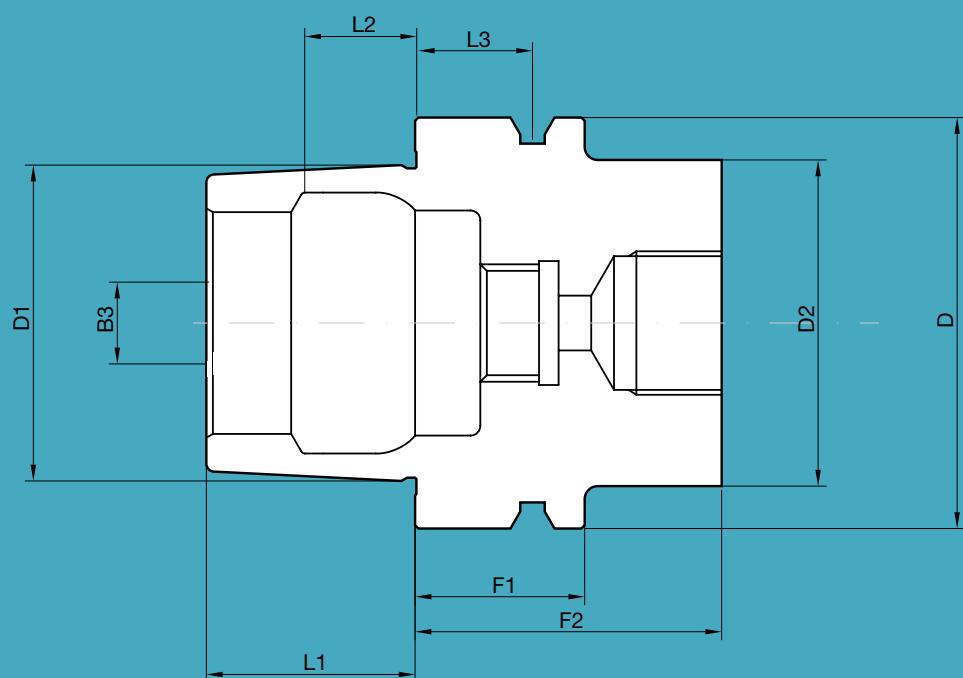

- Fabriqués en bar d'acier certifié.
- Réalisation du traitement thermique par des fournisseurs certifiés ISO 9001.
- Rectification de précision extérieurement, intérieurement et dans les filetages des écrous serre-pince.
- Contrôlés par des instruments de mesure certifiés.
- La tolérance de précision des cônes HSK-F est AT2.
- L'erreur de concentricité maximum entre le cône et le siège de l'outil est de 0.003 mm.

## MERKMALE

- Gebaut aus zertifiziertem Stabstahl
- Warmbehandlungen von Lieferanten mit Zeugnis ISO 9001
- Genauigkeit geschliffen aussen, innen und in den Gewinden der Spannmutter für den Zangenverschluss
- Geprüft mit zertifizierten Messinstrumenten
- Die Präzisionstolleranz der Konen HSK-F ist AT2
- Die max konzentrische Abweichung zwischen Konus und Werkzeugsitz ist 0.003 mm

### CARATTERISTICHE TECNICHE

- Costruiti in acciaio certificato in barre.
- Eseguiti trattamenti termici da fornitori certificati ISO 9001.
- Rettificati di precisione esternamente, internamente e nelle filettature delle ghiere chiudipinza.
- Controllati con strumenti di misura certificati.
- La tolleranza di precisione dei coni ISO è AT2.
- L'errore di concentricità massimo tra il cono e la sede utensile è di 0.003mm.

### TECHNICAL FEATURES

- Manufactured with certificate steel.
- Heat treatments are performed by certified suppliers ISO 9001.
- Precision ground on shanks, inside tapers and collet nut threads.
- Tested with high precision inspection and ganging equipment.
- Taper accuracy of ISO SHANKS lower than AT2.
- The maximum error of concentricity between the cone and the seat of tool is 0.003mm.

### CARACTÉRISTIQUES

- Fabriqués en bar d'acier certifié.
- Réalisation du traitement thermique par des fournisseurs certifiés ISO 9001.
- Rectification de précision extérieurement, intérieurement et dans les filetages des écrous serre-pince.
- Contrôlés par des instruments de mesure certifiés.
- La tolérance de précision des cônes ISO est AT2.
- L'erreur de concentricité maximum entre le cône et le siège de l'outil est de 0.003 mm.

### MERKMALE

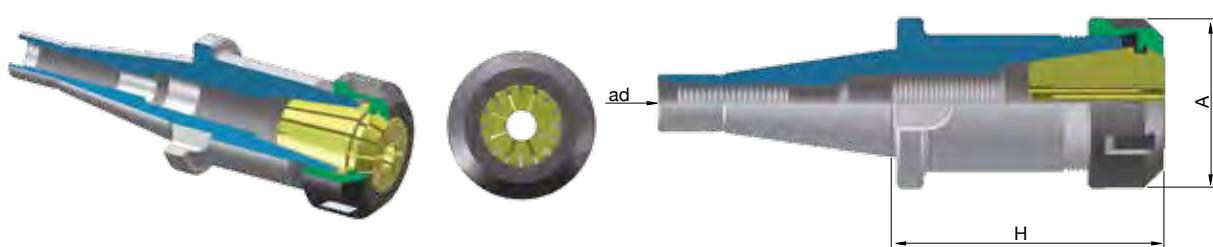

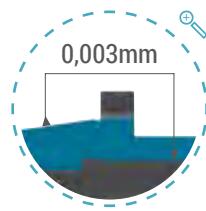

- Gebaut aus zertifiziertem Stabstahl
- Warmbehandlungen von Lieferanten mit Zeugnis ISO 9001
- Genauigkeitsgeschliffen aussen, innen und in den Gewinden der Spannmutter für den Zangenverschluss
- Geprüft mit zertifizierten Messinstrumenten
- Die Präzisionstolleranz der Konen ISO ist AT2
- Die max konzentrische Abweichung zwischen Konus und Werkzeugsitz ist 0.003 mm

## CARATTERISTICHE / SPECIFICATION / CARACTÉRISTIQUES/ TECHNISCHE DATEN

### CARATTERISTICHE TECNICHE

- Costruiti in acciaio certificato in barre
- Eseguiti trattamenti termici da fornitori certificati ISO 9001
- Rettificati di precisione esternamente, internamente e nelle filettature delle ghiere chiudipinza
- Controllati con strumenti di misura certificati
- L'errore di concentricità massimo tra il cono e la sede utensile è 0.003 mm
- Fornibili con o senza piano.

### CARACTÉRISTIQUES

- Fabriqués en bar d'acier certifié.
- Réalisation du traitement thermique par des fournisseurs certifiés ISO 9001.
- Rectification de précision extérieurement, intérieurement et dans les filetages des écrous serre-pince.
- Contrôlés par des instruments de mesure certifiés.
- L'erreur de concentricité maximum entre le cône et le siège de l'outil est de 0.003 mm.
- Peuvent être fournis avec ou sans meplat.

### TECHNICAL FEATURES

- Manufactured with certificate steel
- Heat treatments are performed by certified suppliers ISO 9001
- Precision ground on shank, inside tapers and collet nut threads
- Tested with high precision inspection and ganging equipment
- The maximum error of concentricity between the cone and the seat of tool is 0.003 mm
- Available with or without plan.

### MERKMALE

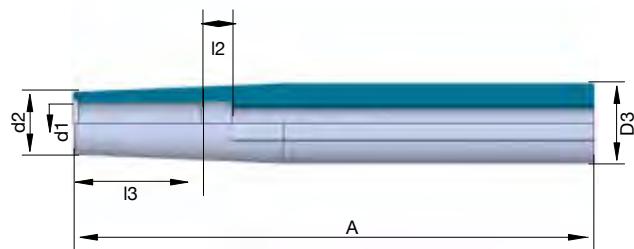

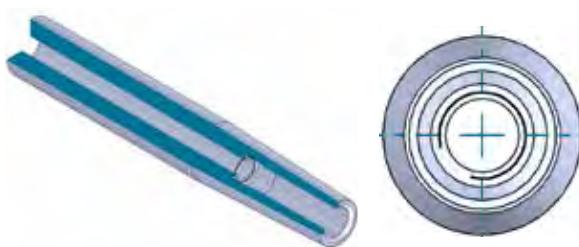

- Gebaut aus zertifiziertem Stabstahl
- Warmbehandlungen von Lieferanten mit Zeugnis ISO 9001
- Genaugkeitsgeschliffen aussen, innen und in den Gewinden der Spannmutter für den Zangenverschluss
- Geprüft mit zertifizierten Messinstrumenten
- Die max konzentrische Abweichung zwischen Konus und Werkzeugsitz ist 0.003 mm
- Erhältlich mit oder ohne top.

## CARATTERISTICHE / SPECIFICATION / CARACTÉRISTIQUES/ TECHNISCHE DATEN

### CARATTERISTICHE TECNICHE

- Costruiti in acciaio certificato in barre
- Eseguiti trattamenti termici da fornitori certificati ISO 9001
- Rettificati di precisione esternamente, internamente e nelle filettature delle ghiere chiudipinza
- Controllati con strumenti di misura certificati
- L'errore di concentricità massimo tra il cono e la sede utensile è 0.003 mm
- Oscillazione radiale 3 mm

### CARACTÉRISTIQUES

- Fabriqués en bar d'acier certifié.
- Réalisation du traitement thermique par des fournisseurs certifiés ISO 9001.
- Rectification de précision extérieurement, intérieurement et dans les filetages des écrous serre-pince.
- Contrôlés par des instruments de mesure certifiés.
- L'erreur de concentricité maximum entre le cône et le siège de l'outil est de 0.003 mm.
- Oscillation 3mm.

### TECHNICAL FEATURES

- Manufactured with certificate steel
- Heat treatments are performed by certified suppliers ISO 9001
- Precision ground on shank, inside tapers and collet nut threads
- Tested with high precision inspection and gaging equipment
- The maximum error of concentricity between the cone and the seat of tool is 0.003 mm
- Radial oscillation 3 mm

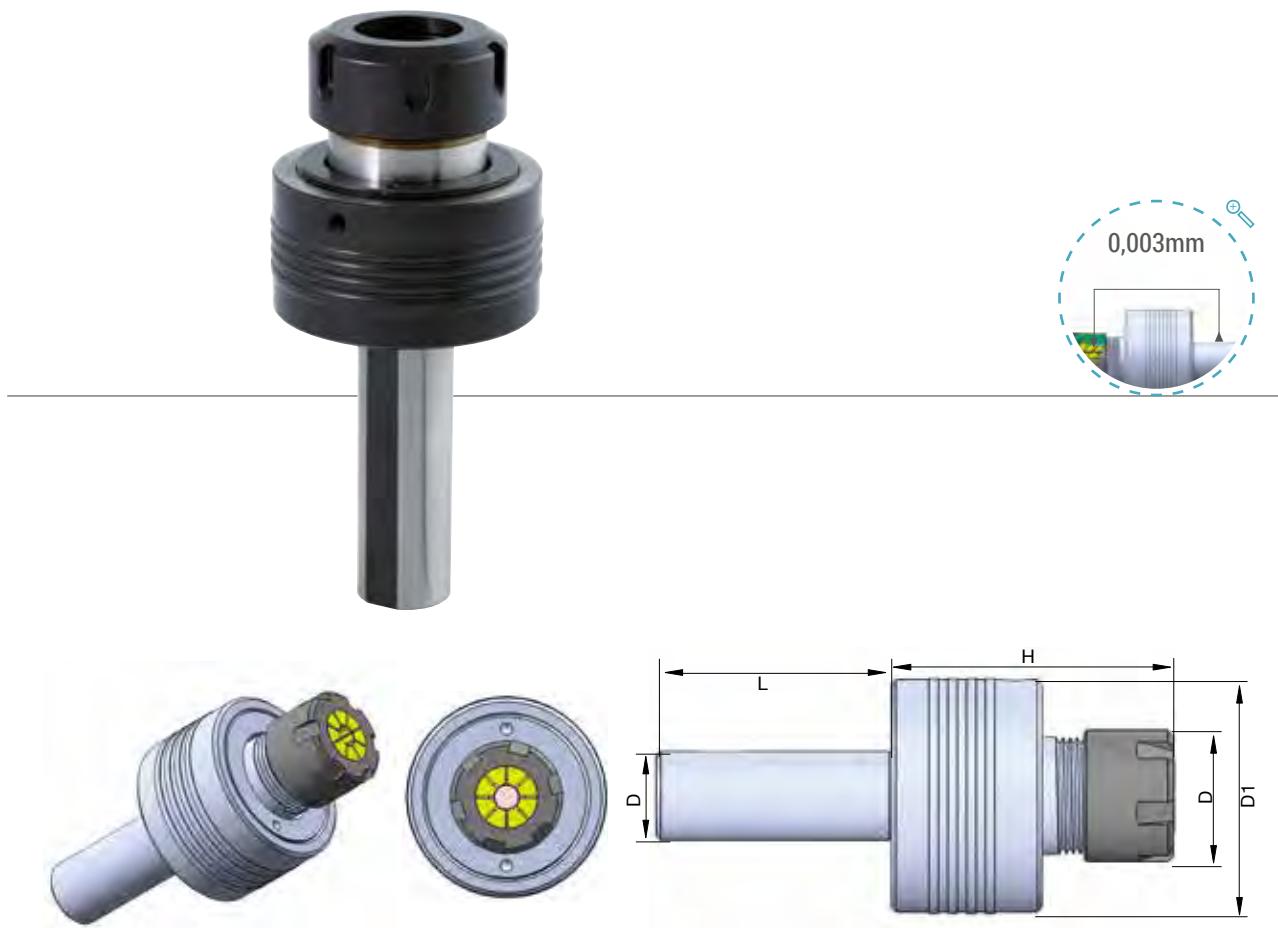

### MERKMALE

- Gebaut aus zertifiziertem Stabstahl
- Warmbehandlungen von Lieferanten mit Zeugnis ISO 9001
- Genauigkeitsgeschliffen aussen, innen und in den Gewinden der Spannmutter für den Zangenverschluss
- Geprüft mit zertifizierten Messinstrumenten
- Die max konzentrische Abweichung zwischen Konus und Werkzeugsitz ist 0.003 mm
- Fluktuation 3mm

## PINZE - INTRODUZIONE

Serinex è specializzata nella produzione di pinze di serraggio per utensili di tutte le tipologie. La nostra produzione spazia dalle pinze per macchine utensili (per lavorazione di acciaio, alluminio ed anche legno e materie plastiche), alle pinze elastiche per mandrini fino a quelle per elettrotensili, in tutte le dimensioni richieste. Per le nostre pinze utilizziamo soltanto acciai speciali legati di alta qualità provenienti da acciaierie qualificate; inoltre tutti i lotti di materiali vengono forniti con certificati di collaudo che ne attestano la qualità e le caratteristiche peculiari. Tutte le lavorazioni meccaniche sono eseguite nella nostra moderna unità produttiva di Annone di Brianza, a breve distanza da Lecco. Per la produzione di pinze elastiche per mandrini, utilizziamo solo macchine CNC di ultima generazione; inoltre tutte le fasi della lavorazione delle pinze per macchine utensili vengono accuratamente controllate dai nostri tecnici, in ottemperanza alle procedure dettate dalla certificazione ISO 9001: 2008, oltre che verificate dalla nostra trentennale esperienza. Tutte le pinze elastiche per mandrini di nostra produzione possono essere fornite in tre classi di precisione: Standard, Ultraprecise e Megaprecise. Tutta la nostra produzione di pinze di serraggio, subisce dopo rettifica una finitura superficiale che mira ad eliminare tutte le creste di lavorazione, ottenendo così una "superfinitura" superficiale. Siamo in grado di realizzare pinze speciali su indicazioni specifiche del cliente e, grazie al nostro ufficio tecnico, possiamo fornire una consulenza specifica per la messa in produzione di pinze con particolari caratteristiche. Nei nostri magazzini automatici sono sempre disponibili tutte le tipologie di pinze a catalogo in tutte le misure in commercio.

## COLLETS - INTRODUCTION

*Serinex is specialized in the production of clamping collets for every kind of tool. Our production stretches from collets for tools machines (for steel working, aluminium working and even wood and plastic working), to elastic collets for adaptors and collets for electric tools, in every size. For our clamping collets we only use high qualified steel, coming from qualified steelsworks; furthermore every lot of material is provided with a quality certificate which guarantees its goodness and its peculiar characteristics. Every working is performed in our modern productive department in Annone di Brianza, not far from Lecco. We only use the latest generation CNC machines to produce elastic collets for adaptors; Furthermore, every phase in the production of tools machines collets is carefully controlled by our technicians, following the legislative procedures contained in the certification ISO 9001: 2008, and verified by our thirty-years experience. All the elastic collets for adaptors can be provided in three classes of precision: Standard, Ultraprecise, Megaprecise. The entire production of clamping collets undergoes a finishing touch called "Extra-fine", which allows to obtain a superficial "super-finishing touch". We are able to realize special collets or collets constructed on specific indications of the customer, and thanks to our technical office we can give professional advice for the production of special collets. In our automatic warehouse every kind of collet is always available in every size on the market.*

# PINCES SPANNZANGEN

## PINCES - INTRODUCTION

Serinex est spécialisée dans la production de pinces de serrage de toutes les typologies. Notre production va des pinces pour machines-outils (pour l'usinage de l'acier, aluminium et aussi pour le bois et les matières plastiques), aux pinces de serrage pour mandrins jusqu'à celles des électro-outils, de toutes les dimensions demandées. Pour les pinces de serrage nous n'utilisons que des alliages d'acières de haute qualité, provenant d'aciéries qualifiées; en outre, tous les lots de matériaux sont fournis avec certificat de qualité qui en atteste leur bonne consistance et les caractéristiques essentielles. Toutes les fabrications mécaniques sont effectuées au sein de notre unité moderne de production d'Annone di Brianza, à proximité de Lecco. Pour la production de pinces de serrage pour mandrins nous n'utilisons que des machines-outils à CNC de dernière génération; en outre, toutes les phases de fabrication des pinces pour machine-outils sont soigneusement contrôlées par nos techniciens, en respectant les procédures dictées par la certification ISO 9001: 2008, en plus des vérifications justifiées par nos trente ans d'expérience. Toutes les pinces de serrage pour mandrins de notre production peuvent être fournies en trois niveaux de précision: Standard, Ultra-précis et Mega-précis. Toute notre production de pinces de serrage, subit une finition de surface dite "Extra-fine" qui élimine tous les défauts de fabrication pour obtenir une "Superbe finition" de surface. Nous sommes en mesure de réaliser des pinces spéciales ou sur indication spécifiques du client et grâce à notre bureau technique, nous pouvons fournir des conseils spécifiques pour la mise en production de pinces à caractéristiques particulières. Dans notre magasin automatique sont toujours disponibles tous les types de pinces dans toutes les dimensions commercialisées.

## SPANNZANGEN - EINFÜHRUNG

*Serinex ist in der Produktion von Spannzangen für Werkzeuge aller Sorten spezialisiert. Unsere Produktpalette betrifft Zangen aller geforderten Abmessungen für Werkzeugmaschinen (für Aluminium-, Kunststoff- und Metallverarbeitung und Holzbearbeitung), Spannzangen für Futter und Spannzangen für Elektrowerkzeuge. Für die Herstellung unserer Spannzangen verwenden wir nur spezielle legierte Stähle höher Qualität, die aus qualifizierten Stahlwerken kommen; Zudem werden alle Posten von Materialien mit Qualitätszertifikaten geliefert, die ihre Güte und eigentümlichen Eigenschaften bescheinigen. Alle mechanischen Verarbeitungen werden in unserem modernen Produktionsbetrieb von Annone di Brianza, in der Nähe von Lecco, durchgeführt. Für die Produktion elastischer Spannzangen für Spannfutter, benutzen wir die modernsten CNC Maschinen; Außerdem werden alle Verarbeitungsphasen der Spannzangen für Werkzeugmaschinen ebenso von unseren Technischen Fachleute sorgfältig kontrolliert, indem sie die Vorgänge der ISO 9001:2008 Zertifikation beachten, wie von unserer dreißigjährigen Erfahrung garantiert. Alle Spannzangen für Spannfutter werden in drei Präzisionsklassen geliefert: Standard, Ultrapräzis und Megapräzis. Unsere ganze Produktion von Spannzangen erfährt die sogenannte „Extra-feine“ oberflächliche Feinbearbeitung, die alle Verarbeitungsgussnähte entfernt, um eine spezielle „Superfeinbearbeitung“ zu erzielen. Wir sind in der Lage, spezielle oder maßgemachte Spannzangen zu erzeugen, und dank unserem Büro für Betriebstechnik können wir eine individuelle Beratung für die Produktion von besonderen Zangen bieten. In unseren automatischen Warenlagern sind immer alle Sorten Spannzangen in allen auf dem Markt existierenden Abmessungen verfügbar.*

# CARATTERISTICHE / SPECIFICATION / CARACTÉRISTIQUES/ TECHNISCHE DATEN

## CARATTERISTICHE TECNICHE

- Sono costruite in acciaio per molle;
- Vengono rettificate sia esternamente che internamente;
- Viene eseguita una fase di superfinitura che garantisce un grado di rugosità inferiore a Rz 2,5;
- Temperate, rinvenute, HRC 45+2
- Fornibili in 3 classi di precisione: 0.002/0.005/0.015

## TECHNICAL FEATURES

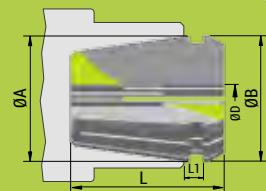

- Built in spring steel
- Grounded both externally and internally;
- After this operation there is an additional phase of finishing, which guarantees a grade of roughness lower than Rz 2,5.
- Quenched and tempered, HRC 45+2
- Can be provided in three classes of precision: 0.002/0.005/0.015

## CARACTÉRISTIQUES

- Elles sont fabriquées en acier pour ressorts.
- Elles sont rectifiées aussi bien extérieurement qu'à l'intérieur.
- après cela une phase de superfinition est effectuée, garantissant un degré de rugosité inférieur à Rz 2,5.
- Trempe et le revenu, HRC 45+2
- Fournis en trois niveaux de précision: 0.002/0.005/0.015

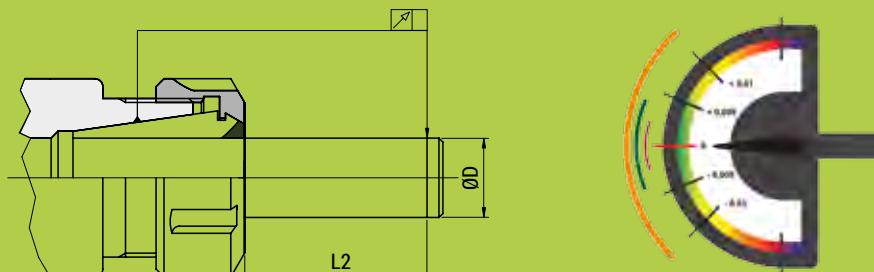

## TECHNISCHE DATEN

- Sie sind aus Federstahl gemacht.
- Sie werden sowohl innen als auch außen geschliffen;
- Nach dieser Verarbeitung wird eine Superfeinbearbeitung durchgeführt, die einen Rauheitsgrad versichert, der niedriger als Rz 2,5 ist.
- Abschreck- und Temperofen, HRC 45+2
- Sie werden in drei Präzisionsklassen geliefert: 0.002/0.005/0.015

# CARATTERISTICHE / SPECIFICATION / CARACTÉRISTIQUES/ TECHNISCHE DATEN

## CARATTERISTICHE TECNICHE

- Il grado di concentricità delle pinze ERG A TENUTA DEL REFRIGERANTE è contenuto in 0,008 mm.
- Sono costruite in acciaio per molle.
- Vengono rettificate sia esternamente che internamente; dopo questa lavorazione, viene eseguita una fase di superfinitura che garantisce un grado di rugosità inferiore a Rz 2,5.
- La vulcanizzazione del taglio canalizza il refrigerante all'interno dell'utensile.
- Massima pressione 40 Bar

## CARACTÉRISTIQUES

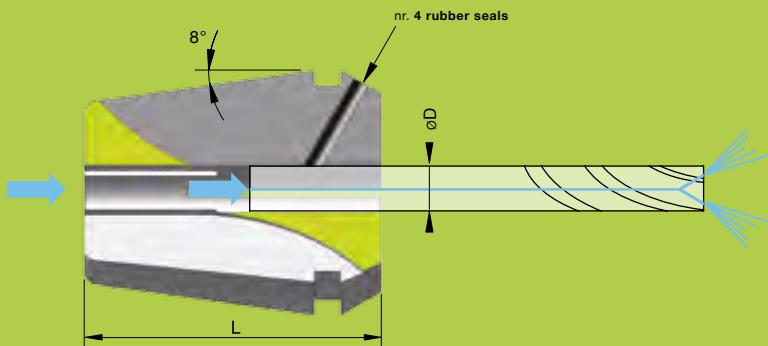

- Le degré de concentration des ERG PINCES ETANCHE est contenu en 0,008 mm.
- Elles sont fabriquées en acier pour ressorts.
- Elles sont rectifiées aussi bien extérieurement qu'à l'intérieur, après cela, une phase de superfinition est effectuée, garantissant un degré de rugosité inférieur à Rz 2,5.
- La vulcanisation du passage canalise le réfrigérant à l'intérieur de l'outil.
- Pression maximale 40 bar

## TECHNICAL FEATURES

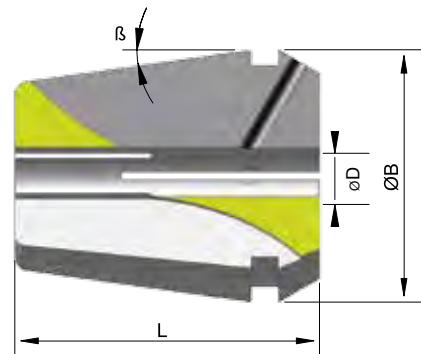

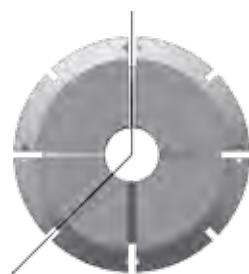

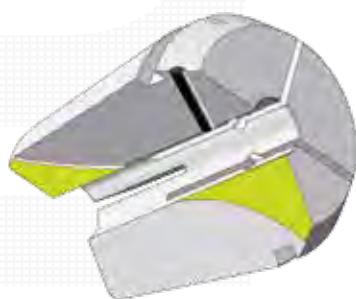

- Concentricity of ERG RUBBER SEALED COLLETS is contained in 0,008 mm.
- Built in spring steel
- Grounded both externally and internally; after this operation there is an additional phase of finishing, which guarantees a grade of roughness lower than Rz 2,5.
- Vulcanization canalizes the cooling system inside the tool.
- Max pressure 40 Bar

## TECHNISCHE DATEN

- Die Rundlaufgenauigkeit der ERG SPANNZANGEN MIT ABDICHTUNG ist in 0,008 mm eingeschränkt
- Sie sind aus Federstahl gemacht.
- Sie werden sowohl innen als auch außen geschliffen; nach dieser Verarbeitung wird eine Superfeinbearbeitung durchgeführt, die einen Rauheitsgrad versichert, der niedriger als Rz 2,5 ist.
- Die Vulkanisation kanalisiert das Kühlmittel in dem Werkzeug.
- Maximaler Druck 40 bar

# CARATTERISTICHE / SPECIFICATION / CARACTÉRISTIQUES/ TECHNISCHE DATEN

## CARATTERISTICHE TECNICHE

- Il grado di concentricità delle pinze ER BAR A TENUTA MECCANICA DEL REFRIGERANTE è contenuto in 0,008 mm.
- Sono costruite in acciaio per molle.
- Vengono rettificate sia esternamente che internamente; dopo questa lavorazione, viene eseguita una fase di superfinitura che garantisce un grado di rugosità inferiore a Rz 2,5.
- La conformazione dei tagli non consente al refrigerante di passare attraverso essi e lo canalizza all'interno dell'utensile
- Massima pressione 120 Bar.

## CARACTÉRISTIQUES

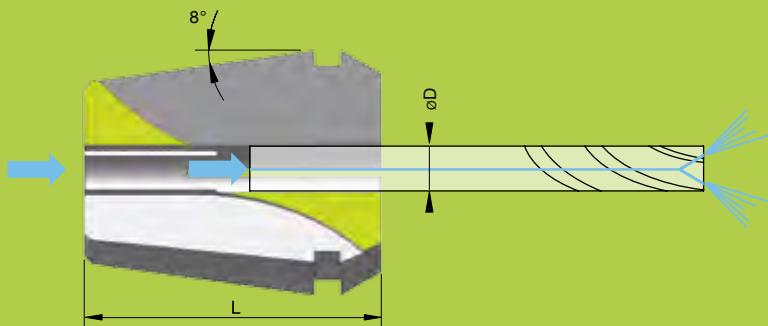

- Le degré de concentration des ER BAR- PINCES ETANCHE MECANIQUE est contenu en 0,008 mm.
- Elles sont fabriquées en acier pour ressorts.
- Elles sont rectifiées aussi bien extérieurement qu'à l'intérieur, après cela, une phase de superfinition est effectuée, garantissant un degré de rugosité inférieur à Rz 2,5.
- La conformation des coupures ne permet pas au réfrigérant de passer par eux et canalisée dans l'outil.
- Pression maximale 120 bar.

## TECHNICAL FEATURES

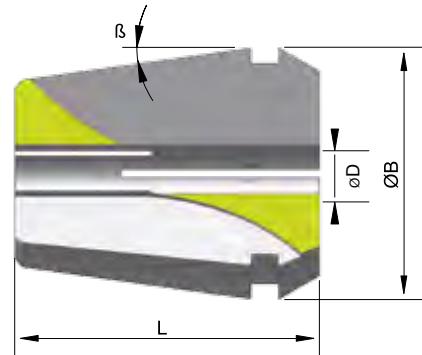

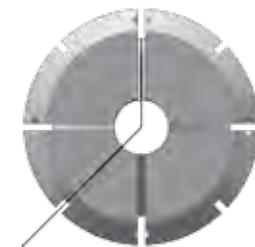

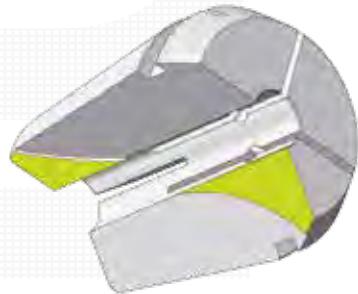

- Concentricity of ER BAR - MECHANICAL SEALED COLLETS is contained in 0,008 mm.
- Built in spring steel
- Grounded both externally and internally; after this operation there is an additional phase of finishing, which guarantees a grade of roughness lower than Rz 2,5.
- The conformation of the cuts does not allow the refrigerant to go through them and channelling it into the tool
- Max pressure 120 Bar.

## TECHNISCHE DATEN

- Die Rundlaufgenauigkeit der ER BAR SPANNZANGEN MIT ABDICHTUNG ist in 0,008 mm eingeschränkt
- Sie sind aus Federstahl gemacht.
- Sie werden sowohl innen als auch außen geschliffen; nach dieser Verarbeitung wird eine Superfeinbearbeitung durchgeführt, die einen Rauheitsgrad versichert, der niedriger als Rz 2,5 ist.
- Die Gestalt der Schnitte lässt das Kühlmittel durch sie nicht fließen und kanalisiert es in dem Inneren des Werkzeugs.
- Maximaler Druck 120 bar.

# CARATTERISTICHE / SPECIFICATION / CARACTÉRISTIQUES/ TECHNISCHE DATEN

## CARATTERISTICHE TECNICHE

- Il grado di concentricità delle pinze ER JET CON FORI DI LUBRIFICAZIONE è contenuto in 0,008 mm.
- Sono costruite in acciaio per molle.
- Vengono rettificate sia esternamente che internamente; dopo questa lavorazione, viene eseguita una fase di superfinitura che garantisce un grado di rugosità inferiore a Rz 2,5.
- La vulcanizzazione del taglio canalizza il refrigerante all'interno degli appositi fori della pinza permettendogli di raggiungere l'utensile.
- Massima pressione 40 Bar.

## TECHNICAL FEATURES

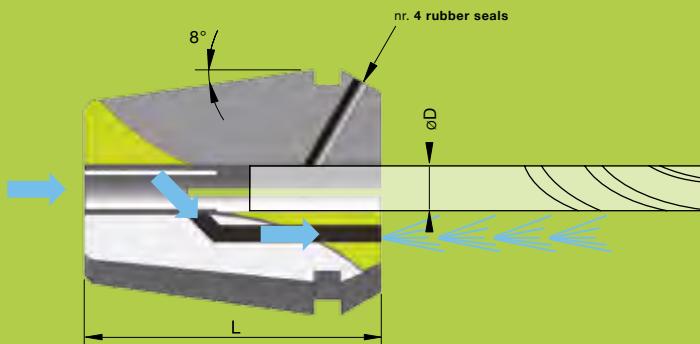

- Concentricity of ER JET EXTERNALLY COOLED COLLETS is contained in 0,008 mm.*
- Built in spring steel*
- Grounded both externally and internally; after this operation there is an additional phase of finishing, which guarantees a grade of roughness lower than Rz 2,5.*
- The vulcanization of the cut, channels the coolant inside the holes of the collet, allowing it to reach the tool.*
- Max pressure 40 Bar.*

## CARACTÉRISTIQUES

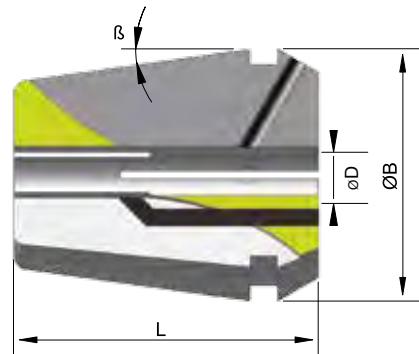

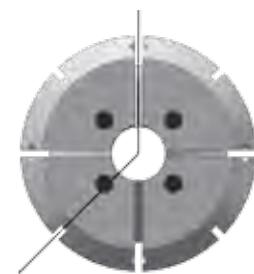

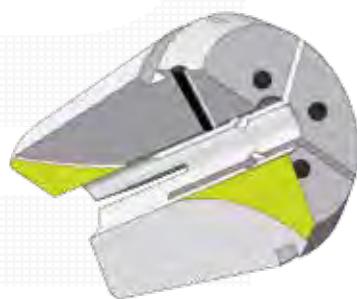

- Le degré de concentration des ER JET PINCES ETANCHE AVEC TROU POUR REFROIDISSEMENT est contenu en 0,008 mm.
- Elles sont fabriquées en acier pour ressorts.
- Elles sont rectifiées aussi bien extérieurement qu'à l'intérieur, après cela, une phase de superfinition est effectuée, garantissant un degré de rugosité inférieur à Rz 2,5.
- La vulcanisation de la coupe, les canaux du fluide de refroidissement à l'intérieur des trous de la pince, ce qui permet d'atteindre l'outil.
- Pression maximale 40 bar.

## TECHNISCHE DATEN

- Die Rundlaufgenauigkeit der ER JET SPANNZANGEN MIT ABDICHTUNG FÜR INNENKÜHLUNG UND SPRITZDÜSE ist in 0,008 mm eingeschränkt*
- Sie sind aus Federstahl gemacht.*
- Sie werden sowohl innen als auch außen geschliffen; nach dieser Verarbeitung wird eine Superfeinbearbeitung durchgeführt, die einen Rauheitsgrad versichert, der niedriger als Rz 2,5 ist.*
- Die Vulkanisation des Schnitts kanalisiert das Kühlmittel in die Löcher der Klammer, so dass es das Werkzeug erreichen kann.*
- Maximaler Druck 40 bar.*

# CARATTERISTICHE / SPECIFICATION / CARACTÉRISTIQUES/ TECHNISCHE DATEN

## CARATTERISTICHE TECNICHE

- Il grado di concentricità delle pinze ERM PORTAMASCHI CON QUADRO è contenuto in 0,015 mm.
- Sono costruite in acciaio per molle
- Vengono rettificate sia esternamente che internamente; dopo questa lavorazione, viene eseguita una fase di superfinitura che garantisce un grado di rugosità inferiore a Rz 2,5.
- Queste pinze sono dotate di un quadro porta maschi.
- I gambi dei maschi si riferiscono allo standard DIN 352-371-376/ISO 529.

## CARACTÉRISTIQUES

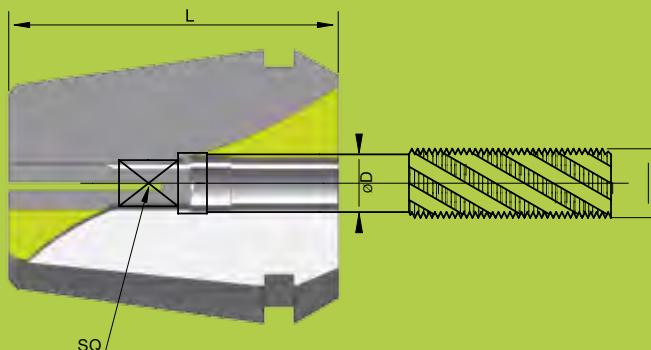

- Le degré de concentration des pince DE TARAUDAGES AVEC CARRE INTERIEUR ERM standard est contenu en 0,015 mm.
- Elles sont fabriquées en acier pour ressorts.
- Elles sont rectifiées aussi bien extérieurement qu'à l'intérieur, après cela, une phase de superfinition est effectuée, garantissant un degré de rugosité inférieur à Rz 2,5.
- Ces pinces sont dotées d'un carré de taraudage.
- Standard DIN 352-371-376/ISO 529.

## TECHNICAL FEATURES

- Concentricity of ERM - TAPPING COLLET WITH INTERNAL SQUARE is contained in 0,015 mm.
- Built in spring steel
- Grounded both externally and internally; after this operation there is an additional phase of finishing, which guarantees a grade of roughness lower than Rz 2,5.
- Tapping collets with internal square
- Standard DIN 352-371-376/ISO 529.

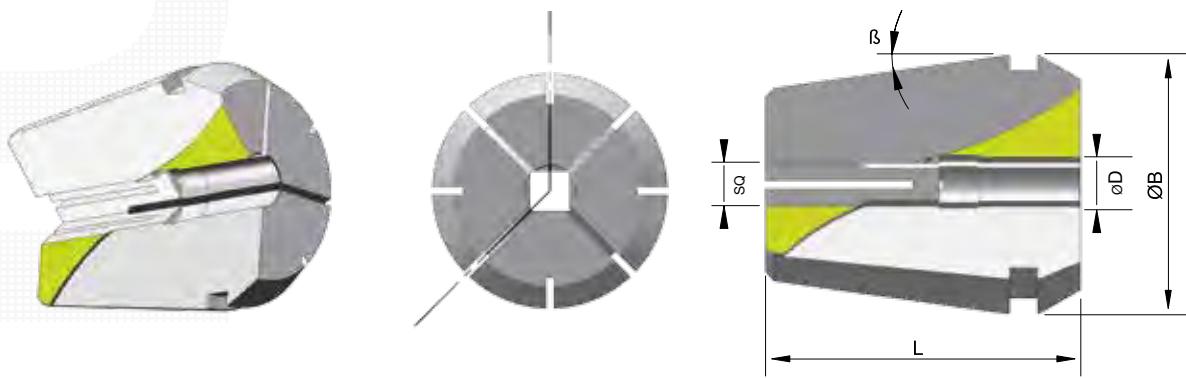

## TECHNISCHE DATEN

- Die Rundlaufgenauigkeit der GEWINDEBOHRSPANNZANGEN MIT VIERECK ist in 0,015 mm eingeschränkt.
- Sie sind aus Federstahl gemacht.
- Sie werden sowohl innen als auch außen geschliffen; nach dieser Verarbeitung wird eine Superfeinbearbeitung durchgeführt, die einen Rauheitsgrad versichert, der niedriger als Rz 2,5 ist.
- Diese Spannzangen sind mit einem Gewindebohrviereck ausgestattet.
- Standard DIN 352-371-376/ISO 529.

# CARATTERISTICHE / SPECIFICATION / CARACTÉRISTIQUES/ TECHNISCHE DATEN

## CARATTERISTICHE TECNICHE

- Il grado di concentricità delle pinze ERGM - PORTAMASCHI CON QUADRO A TENUTA DEL REFRIGERANTE è contenuto in 0,015 mm.
- Sono costruite in acciaio per molle.
- Vengono rettificate sia esternamente che internamente; dopo questa lavorazione, viene eseguita una fase di superfinitura che garantisce un grado di rugosità inferiore a Rz 2,5.
- Queste pinze sono dotate di un quadro porta maschi.
- La vulcanizzazione del taglio canalizza il refrigerante all'interno dell'utensile.

## TECHNICAL FEATURES

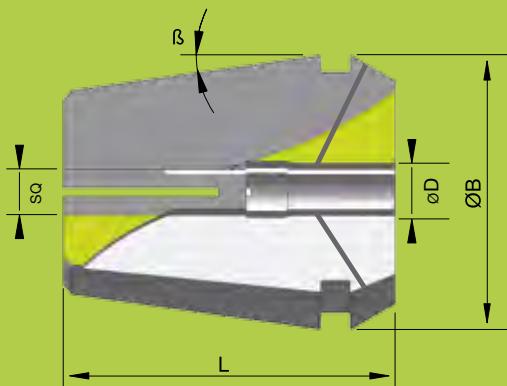

- Concentricity of ERGM - SEALED TAPPING SEALED COLLET WITH INTERNAL SQUARE is contained in 0,015 mm.*
- Built in spring steel*
- Grounded both externally and internally; after this operation there is an additional phase of finishing, which guarantees a grade of roughness lower than Rz 2,5.*
- Tapping collets with internal square*
- Vulcanization canalizes the cooling system inside the tool.*

## CARACTÉRISTIQUES

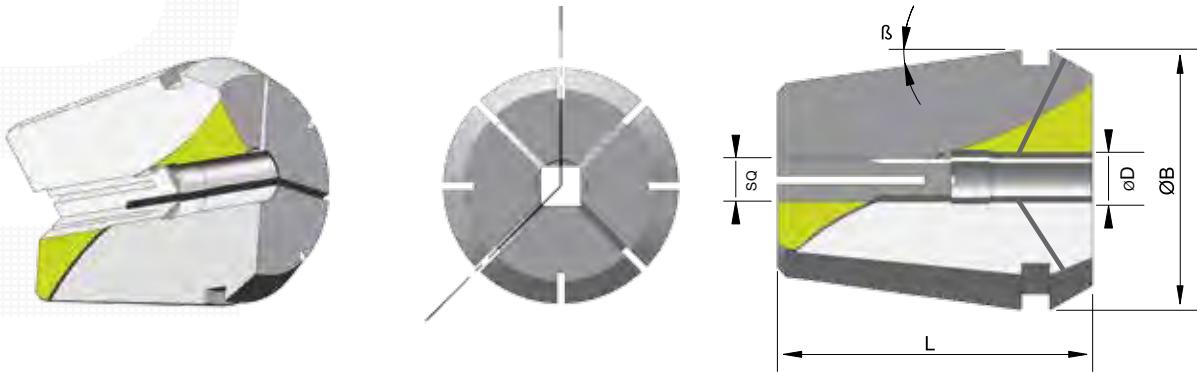

- Le degré de concentration des pinces ERGM - DE TARAUDAGES AVEC CARRE INTERIEUR ET ETANCHE POUR REFRIGERANT est contenu en 0,015mm
- Elles sont fabriquées en acier pour ressort.
- Elles sont rectifiées aussi bien extérieurement qu'à l'intérieur, après cela, une phase de superfinition est effectuée, garantissant un degré de rugosité inférieur à Rz 2,5.
- Ces pinces sont dotées d'un carré de taraudage.
- La vulcanisation du passage canalise le réfrigérant à l'intérieur de l'outil.

## TECHNISCHE DATEN

- Die Rundlaufgenauigkeit der ERGM - GEWINDEBOHRSPANNZANGEN MIT VIERECK MIT ABDICHTUNG FÜR DAS KÜHLMITTEL ist in 0,015 mm eingeschränkt.*
- Sie sind aus Federstahl gemacht.*
- Sie werden sowohl innen als auch außen geschliffen; nach dieser Verarbeitung wird eine Superfeinbearbeitung durchgeführt, die einen Rauheitsgrad versichert, der niedriger als Rz 2,5 ist.*
- Diese Spannzangen sind mit einem Gewindebohrviereck ausgestattet.*
- Die Vulkanisation kanalisiert das Kühlmittel in das Werkzeug.*

# CARATTERISTICHE / SPECIFICATION / CARACTÉRISTIQUES/ TECHNISCHE DATEN

## CARATTERISTICHE TECNICHE

- Compatibili su mandrini con porta pinza ER - DIN 6499
- Compatibili su ghiere standard
- Molla interna regolata per ogni dimensione del maschio
- Compensazione assiale costruita all'interno della pinza
- Garantisce una maggior vita all'utensile.

## TECHNICAL FEATURES

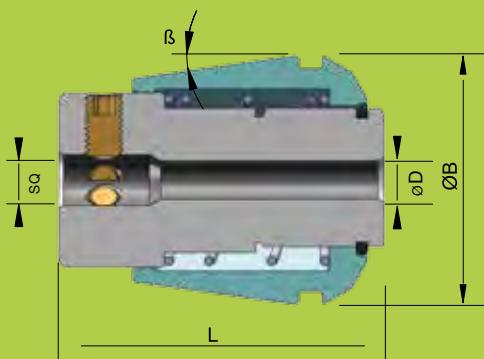

- Compatible with chucks of calliper ER - DIN 6499
- Compatible on standard nuts
- Internal spring adjusted for each dimension of the male
- Compensation axial built inside the collet
- Ensures more durability to the tool.

## CARACTÉRISTIQUES

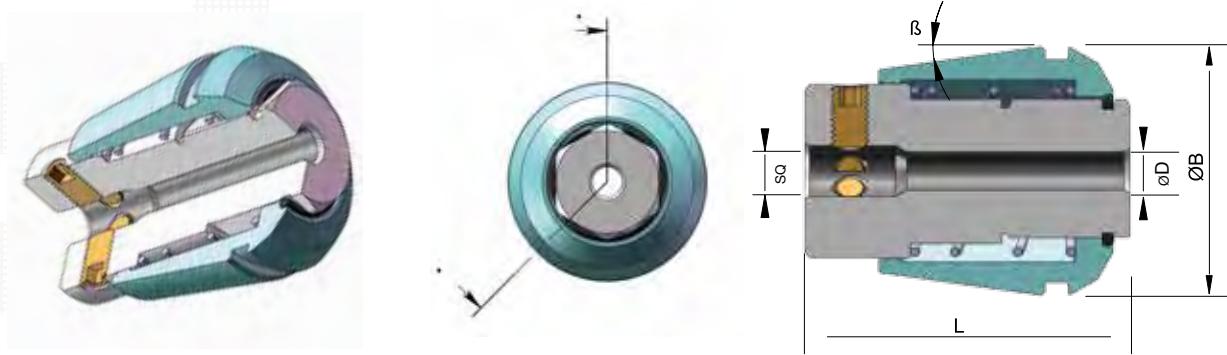

- Compatible avec les mandrins de étrier ER - DIN 6499
- Compatible sur les noix standards
- Ressort interne ajusté pour chaque dimension de l'homme
- Axiale de compensation construit à l'intérieur du pince
- Assure une plus grande durée de vie.

## TECHNISCHE DATEN

- Kompatibel mit Spannzangenfutter ER - DIN 6499
- Kompatibel mit Standard- Spannmuttern
- Für jede Dimension des Außengewinde angepasste Innenfeder
- In der Spannzange eingegebauter axialer Ausgleich
- Sorgt für eine längere Werkzeugstandzeit.

# CARATTERISTICHE / SPECIFICATION / CARACTÉRISTIQUES/ TECHNISCHE DATEN

## CARATTERISTICHE TECNICHE

- Il grado di concentricità delle pinze ERD – DIN9499B è contenuto in 0,008 mm.
- Sono costruite in acciaio per molle.
- Vengono rettificate sia esternamente che internamente; dopo questa lavorazione, viene eseguita una fase di superfinitura che garantisce un grado di rugosità inferiore a Rz 2,5.
- Compatibili su mandrini con porta pinza ER – DIN 6499.

## CARACTÉRISTIQUES

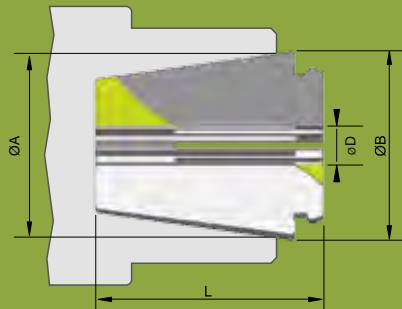

- Le degré de concentration des pinces SYSTEME ETS - DIN 9499B est contenu en 0,008 mm.
- Elles sont fabriquées en acier pour ressorts.
- Elles sont rectifiées aussi bien extérieurement qu'à l'intérieur, après cela une phase de superfinition est effectuée, garantissant un degré de rugosité inférieur à Rz 2,5.
- Compatible avec mandrins pour ER - DIN 6499.

## TECHNICAL FEATURES

- Concentricity of COLLETS ETS SYSTEM – DIN 9499B is contained in 0,008 mm.
- Built in spring steel.
- Grounded both externally and internally; after this operation there is an additional phase of finishing, which guarantees a grade of roughness lower than Rz 2,5
- Compatible with chucks of collets ER - DIN 6499.

## TECHNISCHE DATEN

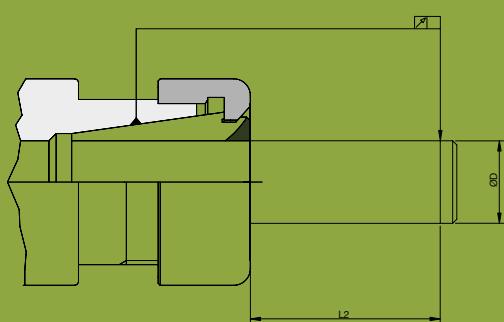

- Die Rundlaufgenauigkeit der SPANNZANGEN ERD SYSTEM – DIN 9499B ist in 0,008 mm eingeschränkt.
- Sie sind aus Federstahl gemacht.
- Sie werden sowohl innen als auch außen geschliffen; nach dieser Verarbeitung wird eine Superfeinbearbeitung durchgeführt, die einen Rauheitsgrad versichert, der niedriger als Rz 2,5 ist.
- Kompatibel mit Spannfutter ER - DIN 6499
- Empfohlen für Anwendung, in der Sie eine größere Spannkraft als DIN 6499 erforderlich.

# CARATTERISTICHE / SPECIFICATION / CARACTÉRISTIQUES/ TECHNISCHE DATEN

## CARATTERISTICHE TECNICHE

- Il grado di concentricità delle pinze CILINDRICHE PER MANDRINI IDRAULICI E A FORTE SERRAGGIO è contenuto in 0,005 mm.
- Sono costruite in acciaio per molle.
- Vengono rettificate sia esternamente che internamente; dopo questa lavorazione, viene eseguita una fase di superfinitura che garantisce un grado di rugosità inferiore a Rz 2,5.
- Pinze a 4 tagli a tenuta del refrigerante per mandrini a forte serraggio.
- Pinze a 6 tagli a tenuta del refrigerante per mandrini idraulici.

## CARACTÉRISTIQUES

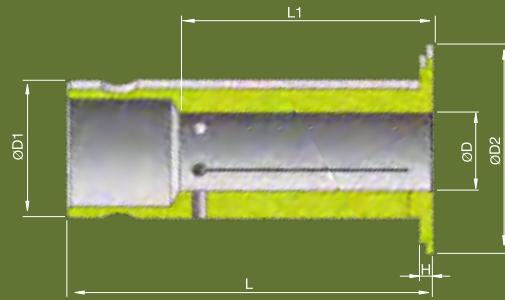

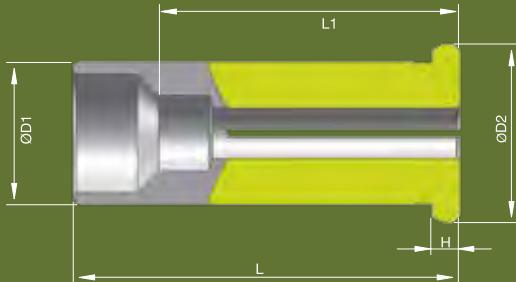

- Le degré de concentration des pinces CYLINDRIQUES POUR MANDRINS A GRAND PUISSANCE DE SERRAGE ET HYDRAULIQUES est contenu en 0,005 mm.
- Elles sont fabriquées en acier pour ressorts.
- Elles sont rectifiées aussi bien extérieurement qu'à l'intérieur, après cela une phase de superfinition est effectuée, garantissant un degré de rugosité inférieur à Rz 2,5.
- Pinces à 4 coupes étanches pour mandrins à fort serrage.
- Pinces à 6 coupes étanches pour mandrins hydrauliques.

## TECHNICAL FEATURES

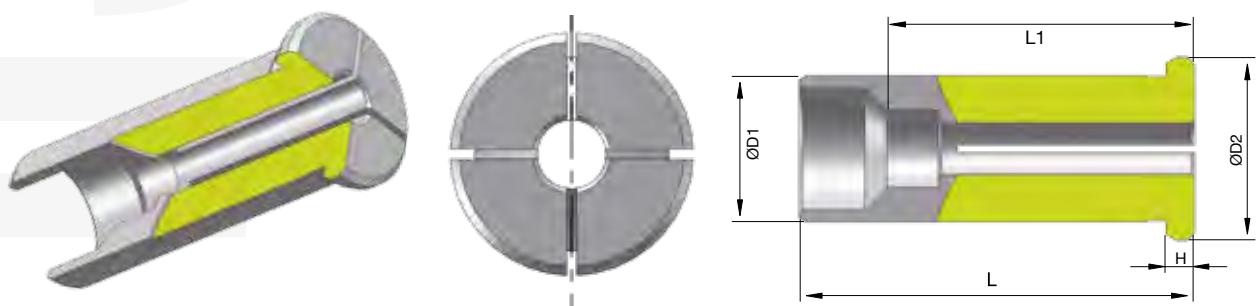

- Concentricity of STRAIGHT COLLETS FOR HYDRAULIC AND POWER MILLING CHUCKS is contained in 0,005 mm.*
- Built in spring steel*
- Grounded both externally and internally; after this operation there is an additional phase of finishing, which guarantees a grade of roughness lower than Rz 2,5*
- Sealed fourth-cuts collet for power milling chucks*
- Sealed sixth-cut collet for hydraulic adaptors.*

## TECHNISCHE DATEN

- Die Rundlaufgenauigkeit der ZYLINDRISCHE SPANNZANGEN FÜR KLEMMFUTTER UND HYDRODEHNSPANNFUTTER ist in 0,005 mm eingeschränkt.*
- Sie sind aus Federstahl gemacht.*
- Sie werden sowohl innen als auch außen geschliffen; nach dieser Verarbeitung wird eine Superfeinbearbeitung durchgeführt, die einen Rauheitsgrad versichert, der niedriger als Rz 2,5 ist.*
- Vier-Schnitte Spannzangen mit Abdichtung für das Kühlmittel für Klemmfutter.*
- Vier-Schnitte Spannzangen mit Abdichtung für das Kühlmittel für Hydrodehnspannfutter.*

# PINZE DIN 6388

OZ SYSTEM COLLETS DIN 6388

## STANDARD PRECISION

Precisione di rotazione  
*Concentricity specifications*

**0.015** A value of 0.015 followed by a measuring tape icon, indicating the concentricity specification.

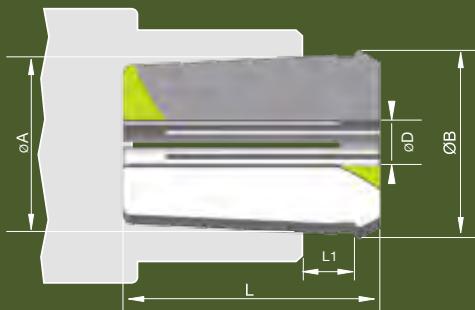

# CARATTERISTICHE / SPECIFICATION / CARACTÉRISTIQUES/ TECHNISCHE DATEN

## CARATTERISTICHE TECNICHE

- Il grado di concentricità delle pinze EOC – DIN6388 B di precisione standard è contenuto in 0,010-0,015 mm.
- Sono costruite in acciaio per molle.
- Vengono rettificate sia esternamente che internamente; dopo questa lavorazione, viene eseguita una fase di superfinitura che garantisce un grado di rugosità inferiore a Rz 2,5.
- Adatte per lavorazioni in cui si richiede una maggior forza di chiusura rispetto alle DIN 6499.

## TECHNICAL FEATURES

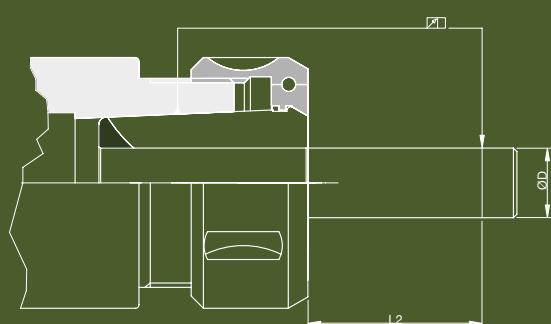

- Concentricity of COLLETS OZ SYSTEM – DIN6388 B is contained in 0,010-0,015 mm.*
- Built in spring steel.*
- Grounded both externally and internally; after this operation there is an additional phase of finishing, which guarantees a grade of roughness lower than Rz 2,5*
- Recommended for application in which you require a greater clamping force than ER collet DIN 6499.*

10	18	40	0.020				

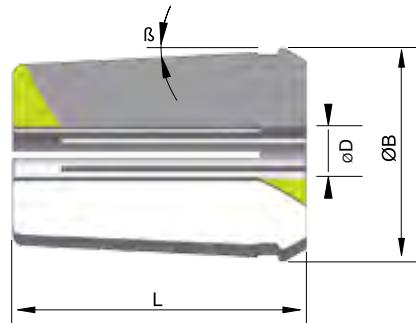

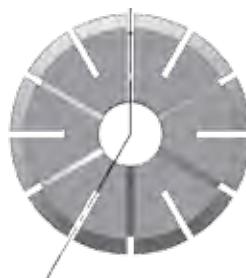

## CARACTÉRISTIQUES

- Le degré de concentration des pinces SYSTEME OZ - DIN6388 B est contenu en 0,010-0,015mm.
- Elles sont fabriquées en acier pour ressorts.
- Elles sont rectifiées aussi bien extérieurement qu'à l'intérieur, après cela, une phase de superfinition est effectuée, garantissant un degré de rugosité inférieur à Rz 2,5.
- Recommandé pour l'application dans laquelle vous désirez une plus grande force de serrage à la norme ER pince DIN 6499

## TECHNISCHE DATEN

- Die Rundlaufgenauigkeit der SPANNZANGEN OZ - DIN 6388B ist in 0,010-0,015 mm eingeschränkt.
- Sie sind aus Federstahl gemacht.
- Sie werden sowohl innen als auch außen geschliffen; nach dieser Verarbeitung wird eine Superfeinbearbeitung durchgeführt, die einen Rauheitsgrad versichert, der niedriger als Rz 2,5 ist.
- Sie sind für Anwendungen empfohlen, in denen eine größere Spannkraft als DIN 6499 erforderlich ist.

# CARATTERISTICHE / SPECIFICATION / CARACTÉRISTIQUES/ TECHNISCHE DATEN

## CARATTERISTICHE TECNICHE

- Sono costruite in acciaio per molle.
- Vengono rettificate sia esternamente che internamente; dopo questa lavorazione, viene eseguita una fase di superfinitura che garantisce un grado di rugosità inferiore a Rz 2,5.
- Adatte per lavorazioni in cui è richiesta una precisione e una rigidità maggiore rispetto alla pinza ER DIN 6499
- Sono utilizzabili solo sul mandrino con sede pinza SKS e apposita ghiera.

## TECHNICAL FEATURES

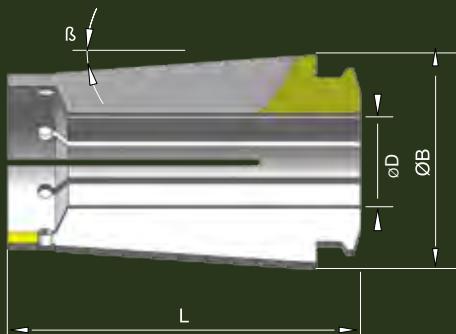

- Built in spring steel
- Grounded both externally and internally; after this operation there is an additional phase of finishing, which guarantees a grade of roughness lower than Rz 2,5
- Suitable for workings of high precision and where it is requested more rigidity than in ER DIN 6499 collet
- Can be used on toolholder with SKS collet seat and provided nut.

## CARACTÉRISTIQUES

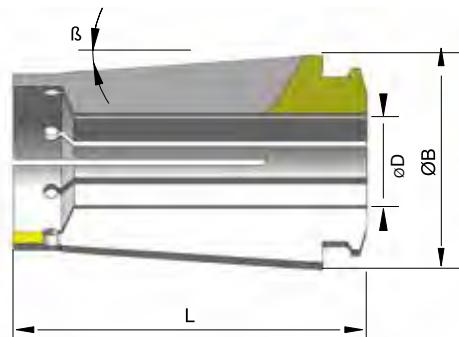

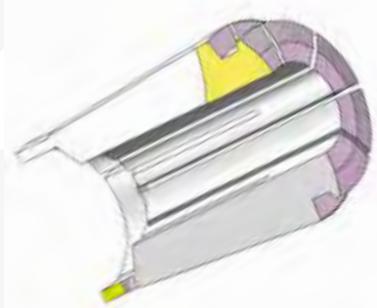

- Sont construites en acier pour ressorts;
- Sont rectifiées soit extérieurement soit intérieurement; après ce travail, une phase de super-finition est exécutée pour garantir un degré de rugosité inférieur au Rz 2,5;
- Sont aptes pour travaux pour lesquels est demandée une précision et une grande rigidité par rapport à la pince ER DIN 6499;
- Sont utilisables sur le mandrin avec siège de la pince SKS et écrou spécial.

## TECHNISCHE DATEN

- Sie sind aus Federstahl gemacht
- Sie werden sowohl innen als auch außen geschliffen; nach dieser Verarbeitung wird eine Superfeinbearbeitung durchgeführt, die einen Rauheitsgrad versichert, der niedriger als Rz 2,5 ist.
- Sie sind für Anwendungen empfohlen, in denen eine größere Präzision und Starrheit als die Spannzange ER DIN 6499 erforderlich ist
- Sie können sie auf dem Spannfutter mit Sitz für Spannzange SKS und geeigneter Mutter anwenden.

# GHIERE CLAMPING NUTS

## GHIERE - INTRODUZIONE

Serinex produce ghiere di serraggio ERX DIN6499 standard, mini, esagonali, a sfere con tacche e senza tacche, EOC DIN6388 con sfere e senza sfere, ERXD-ETS, FORMA A con fori e con esagono, ghiere a tenuta del refrigerante standard, ghiere con canali di lubrificazione e chiavi per ghiere, chiavi a settore e chiavi dinamometriche. Tutti i particolari sono prodotti con un elevato standard qualitativo per una massima sicurezza operativa.

Utilizziamo per la nostra produzione di ghiere soltanto barre di acciai legati di altissima qualità provenienti da acciaierie qualificate, fornite con certificati di qualità e controllate singolarmente con unità di controllo ad "ultrasuoni" per scongiurare difetti interni del materiale come cricche o microlesioni. Inoltre tutta la nostra produzione subisce un trattamento termico specifico per ottenere le maggiori doti di resistenza e resilienza a prodotto finito.

## CLAMPING NUTS - INTRODUCTION

*Serinex produces nuts ERX DIN6499 standard, small-size, hexagonal, ball-bearing, EOC DIN6388 with or without sphere, ERXD-ETS, externally threaded nuts, externally threaded exagonal nuts, sealed nuts, nuts with coolant channel, nuts with seal disks, wrenches for nuts and dynamometric wrenches with an high qualitative standard for a maximum operative safety.*

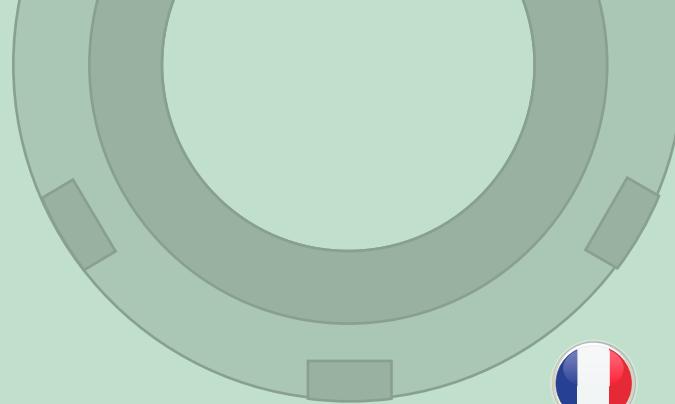

*We only use high quality steel for our nuts production, produced in qualified steel plant, provided with quality certifications and individually controlled with ultrasounds in order to avoid internal deficiency of the material. Furthermore, our pull studs production undergoes a specific heat-treatment to obtain superior quality of resistance and resilience.*

## ATTENZIONE / ATTENTION

DATI TECNICI ED IMMAGINI SONO INDICATIVI. SERINEX SI RISERVA DI APPORTARE AGGIORNAMENTI IN QUALSIASI MOMENTO E SENZA OBBLIGO DI PREAVVISO.

TECHNICAL DATA AND DRAWINGS ARE FOR INFORMATION PURPOSES ONLY. SERINEX RESERVES THE RIGHT TO UPDATE SPECS AT ANYTIME AND WITHOUT NOTICE.

# ECROUS SPANNMUTTERN

## ECROUS - INTRODUCTION

Serinex produit des écrous ERX DIN 4699 standard, mini, hexagonaux, à billes avec ou sans encoches, EOC DIN 6388 avec ou sans billes, ERD ETS, écrous avec filetage externe, écrous avec filetage externe hexagonaux écrous étanche, écrous avec passages de lubrification, clés à écrous, clés à crochet et clés dinamométriques avec un standard de qualité très élevé pour une sécurité opérationnelle maximale.

Pour la production d'écrous nous utilisons des barres d'alliage d'acier de très haute qualité provenant d'aciéries qualifiées, fournies avec certificat de qualité et contrôlées singulièrement avec une unité de contrôle à "ultrasons" pour éviter les défauts internes du matériel telles les fissures et les micro lésions.

En outre, notre production des écrous subit un traitement thermique spécifique pour obtenir une meilleure qualité de résistance et résilience du produit fini.

## SPANNMUTTERN- EINFÜHRUNG

Serinex erzeugt ERX Standard-, Mini-, Sechskantmuttern, ERX Kugelnutmuttern mit oder ohne Rasten, EOC mit oder ohne Kugeln, ERXD-A-GESTALT (Muttern mit Außengewinde), mit Löchern bzw. mit Sechskant, Muttern für Inneren, Dichtmuttern für das Kühlmedium, sechskantige Dichtmuttern für das Kühlmedium, Muttern mit Rinnen für die Schmierung, Mutternschlüssel und Hakenschlüssel.

Alle unsere Produkte bieten einen hohen Qualitätsstandard für die höchste Betriebssicherheit. Für unsere Produktion von Spannmuttern verwenden wir nur legierte Stähle höher Qualität, die aus qualifizierten Stahlwerken kommen, mit Qualitätszertifikaten geliefert und mit Ultraschall-Prüfeinheiten einzeln kontrolliert werden, um innere Fehler wie Risse oder Mikrobeschädigungen abzuwenden. Zudem erfährt unsere ganze Produktion von Spannmuttern eine spezifische Wärmebehandlung, um die beste Eigenschaften von FESTIGKEIT und KERBSCHLAGZÄHIGKEIT des Endprodukts zu erzielen.

## AVERTISSEMENT / WARNUNG

# ISTRUZIONI / INSTRUCTIONS / INSTRUCTIONS / MONTAGE

## ASSEMBLAGGIO DELLA PINZA - FIG.1

- 1- Introdurre la pinza inclinata nella ghiera di serraggio per accoppiare la scanalatura della pinza (A) con la sede eccentrica della ghiera (B).
- 2- Avvitare la ghiera con la pinza sul mandrino.
- 3- Mai chiudere la ghiera senza un utensile nella pinza.
- 4- Montare l'utensile e bloccare la ghiera con l'apposita chiave.

## ESTRAZIONE DELLA PINZA

- 5- Spingere sulla parte posteriore della pinza fino a disinnestarla dalla ghiera.

## ATTENZIONE - FIG.2

LE PINZE DEVONO ESSERE INSERITE NELLE GHIERE PRIMA DI MONTARLE CON L'UTENSILE SUL MANDRINO.  
La mancata osservanza di questa condizione causa il danneggiamento definitivo della pinza e della ghiera di serraggio.

## COLLET INSERTING - FIG.1

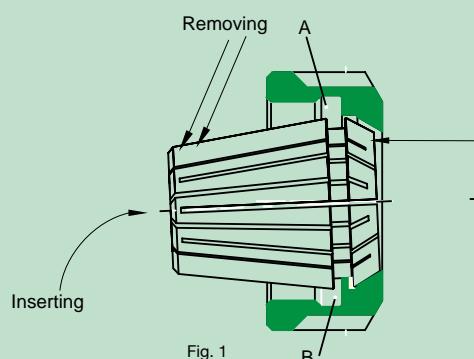

- 1- Insert the collet into the collet nut, making sure that the collet groove (A) is engaged with the eccentric ring extractor (B).
- 2- Only then mount collet and collet nut into the holder
- 3- Never lock the nut without a tool in the collet.
- 4- Mount tool and lock with appropriate spanner.

## COLLET REMOVING

- 5- Push on the back of the collet until it disengages from the clamping nut.

## WARNING - FIG.2

ERC COLLETS MUST BE CONNECTED INTO COLLET NUT BEFORE INSERTING TOOL OR ASSEMBLING ONTO CHUCK.  
A wrong assembly may severely damage the collet and the clamping nut.

## ASSEMBLAGE DE LA PINCE - FIG. 1

- 1- Introduire la pince inclinée dans l'écrou de serrage pour accoupler la cannelure de la pince A, avec le siège excentrique de l'embout (B).
- 2- Visser l'écrou avec la pince sur le mandrin.
- 3- Jamais fermer l'écrou sans un outil dans la pince.
- 4- Moter l'outil et bloquer l'écrou avec la spéciale clé.

## EXTRACTION DE LA PINCE

- 5- Pousser sur la partie postérieure de la pince jusqu'à la débrancher de écrou.

## ATTENTION - FIG.2

LES PINCES DOIVENT ÊTRE INSÉRÉES DANS LES ÉCROUS AVANT DE LEUR ASSEMBLAGE AVEC L'OUTIL SUR LE MANDRIN.  
Cette non-observance aboutit à l'endommagement définitif de la pince et de l'écrou de serrage.

## ANWEISUNGEN DER ZANGE – BILD 1

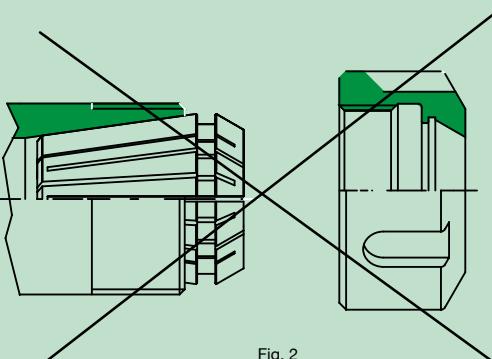

- 1- Die Zange schief in die Spannmutter einsetzen, um die Nut der Zange (A) mit dem exzentrischen Sitz der Spannmutter (B) zu kuppeln.
- 2- Die Spannmutter mit der Zange auf dem Spannfutter anschrauben
- 3- Die Spannmutter nie ohne ein Werkzeug in der Zange schliessen.
- 4- Das Werkzeug montieren und die Spannmutter mit dem Schlüssel blockieren

## AUSZIEHUNG DER ZANGE

- 5- Auf dem Hinterteil der Zange drücken bis sie von der Spannmutter entfernt ist.

## ACHTUNG – BILD 2

DIE ZANGEN MÜSSEN IN DIE SPANNMUTTERN GESETZT WERDEN, BEVOR SIE MIT DEM WERKZEUG AUF DEM SPANNMUTTER MONTIERT WERDEN.  
Wenn man diese Bedingung nicht beachtet, wird die Zange und die Spannmutter definitiv beschädigt.

## COPPIE DI SERRAGGIO CONSIGLIATE / RECOMMENDED CLAMPING TORQUE COUPLES DE SERRAGE CONSEILLES / RATSAME ANZIEHMOMENTE

### ERX STANDARD

GHIERE/NUTS	FILETTO/THREAD	COPPIA MIN./MIN TORQUE	COPPIA MAX./MAX TORQUE

## CODOLI - INTRODUZIONE

Serinex produce codoli di aggancio di tutte le tipologie: BT, DIN, ISO, CAT-METRIC, HURCO, JIS 6339, OTT, CHIRON, C.B.FERRARI, KITAMURA, MITSUI, codoli di aggancio per macchine per la lavorazione del legno e della plastica, oltre che speciali a disegno. È possibile, inoltre, fornire i codoli di aggancio con uno specifico trattamento antiruggine.

Tutti i codoli sono prodotti con un elevato standard qualitativo per una massima sicurezza operativa.

Utilizziamo per la nostra produzione di codoli per mandrini soltanto barre di acciai legati di altissima qualità, provenienti da acciaierie qualificate, fornite con certificati di qualità e controllate singolarmente con unità di controllo ad "ultrasuoni" per scongiurare difetti interni del materiale come cricche o microlesioni.

Inoltre tutta la nostra produzione subisce un trattamento termico specifico per ottenere le maggiori doti di resistenza e resilienza a prodotto finito.

Tutte le lavorazioni meccaniche sono eseguite nella nostra moderna unità produttiva di Annone Brianza, situato a breve distanza da Lecco, in un comparto di oltre 7000 mq. dotato di un ampio parco macchine con una produzione giornaliera elevata.

Nella nostra unità produttiva, utilizziamo solo macchine CNC di ultima generazione;

inoltre tutte le fasi della lavorazione vengono accuratamente controllate dai nostri tecnici, in ottemperanza alle procedure dettate dalla certificazione ISO 9001: 2008, oltre che verificate dalla nostra più che ventennale esperienza.

Nel nostro magazzino automatico sono sempre disponibili tutte le tipologie di codoli più usati in tutte le tipologie in commercio.

## PULL STUDS - INTRODUCTION

Serinex produces every kind of pull studs: BT, DIN, ISO, CAT-METRIC, HURCO, JIS 6339, OTT, CHIRON, C.B.FERRARI, KITAMURA, MITSUI, wood-working machines pull stud and pull stud for adaptors). Is also possible to supply the pull studs with a specific anti rusting treatment.

Every pull stud follows a high-quality standard to pursue the maximum operative safety.

For our production we only use high-quality steel bar, produced in qualified steel plant, provided with quality certifications and individually controlled with ultrasounds in order to avoid internal deficiency of the material.

Furthermore, our pull studs production undergoes a specific heat-treatment to obtain superior quality of resistance and resilience.

All the mechanical workings are performed in our modern division in Annone Brianza, not far from Lecco, in a place of more than 7000 mq. , supplied with a wide rolling stock with a high daily production.

In our productive unit, we only use latest generation CNC machines; furthermore every working phase is carefully controlled by our technicians, following the procedures of the certification ISO 9001: 2008, and verified by our twenty-years experience.

In our automatic storehouse every kind of pull studs is always available, in every typology on the market.

# TIRETTES ANZUGSBOLZEN

## TIRETTES - INTRODUCTION

Serinex produit des tirettes de toute typologie: BT, DIN, ISO, CAT-METRIC, HURCO, JIS6339, OTT, CHIRON, C.B.FERRARI, KITAMURA, MITSUI, tirettes pour machines de travail du bois et tirettes pour mandrins). En outre, il est possible fournir les tirettes avec un traitement spécifique anti-rouille.

Toutes les tirettes sont produites avec un standard qualitatif très élevé pour une sécurité opérationnelle maximale.

Pour la production de tirettes pour mandrins nous n'utilisons que des barres d'alliages d'acières de très haute qualité , provenant d'aciéries qualifiées, fournies avec certificat de qualité et soumises à une unité de contrôle à "ultrasons" pour éviter les défauts internes du matériel telles les fissures et les micro lésions.

En outre, toute notre production de tirettes subit un traitement thermique spécifique pour obtenir une qualité élevée de résistance et résilience du produit fini.

Toutes les fabrications mécaniques sont effectuées au sein de notre unité moderne de production d'Annone Brianza, située à une courte distance de Lecco, dans un bâtiment de plus de 7000 m<sup>2</sup>, doté d'un large parc de machines avec une production journalière élevée.

Dans l'unité de production "tirettes", nous n'utilisons que des machines-outils à CNC de dernière génération;

en outre, toutes les phases de fabrication sont soigneusement contrôlées par nos techniciens, en respectant les procédures dictées par la certification ISO 9001: 2008, en plus des vérifications soutenues par nos 20 années d'expérience.

Notre magasin automatique dispose toujours de tous les types de tirettes les plus utilisées de tous les types en commerce.

## ANZUGSBOLZEN - EINFÜHRUNG

Serinex produziert Anzugsbolzen aller Sorten: BT, DIN, ISO, CAT-METRIC, HURCO, JIS 6339, OTT, CHIRON, C.B.FERRARI, KITAMURA, MITSUI, Anzugsbolzen für Werkzeugmaschinen für die Holzbearbeitung und Anzugsbolzen für Futter).

Alle Anzugsbolzen sind mit einem Qualitätsstandard für die höchste Betriebssicherheit hergestellt.

In der Produktion von Anzugsbolzen für Futter verwenden wir nur legierte Stähle höher Qualität, die aus qualifizierten Stahlwerken kommen, mit Qualitätszertifikaten geliefert und mit Ultraschall-Prüfeinheiten einzeln kontrolliert werden, um innere Fehler wie Risse oder Mikrobeschädigungen abzuwenden.

Zudem erfährt unsere ganze Produktion von Anzugsbolzen eine spezifische Wärmebehandlung, um die besten Eigenschaften von Festigkeit und Kerbschlagzähigkeit des Endprodukts zu erzielen.

Alle mechanischen Verarbeitungen werden bei unserem modernen Produktionsbetrieb von Annone Brianza durchgeführt, der sich in einer Abteilung von mehr als 7000 Quadratmetern in der Umgebung von Lecco befindet und über einen breiten Maschinenpark mit einer hohen täglichen Produktion ausgestattet ist.

In der Abteilung für die Anzugsbolzen, benutzen wir die modernsten CNC-Maschinen; außerdem werden alle Verarbeitungsphasen ebenso von unseren Technischen sorgfältig kontrolliert, indem sie die Vorgänge der ISO 9001:2008-Zertifikation beachten, wie von unserer zwanzigjährigen Erfahrung garantiert.

In unserem automatischen Warenlager sind immer alle auf dem Markt existierenden Sorten Anzugsbolzen verfügbar.

## CARATTERISTICHE / SPECIFICATION / CARACTÉRISTIQUES/ TECHNISCHE DATEN

### ITALIANO CARATTERISTICHE TECNICHE

- Costruiti in acciaio speciale con elevata resistenza;
- Sono cementati, temprati, rinvenuti, sabbiati e bruniti;
- Vengono rettificati su tutto il profilo di aggancio e sede del mandrino con rettifiche a CNC provviste di posizionatore e misuratore in process.

### ENGLISH TECHNICAL FEATURES

- Built with special steel;
- Carburized, hardened, tempered, sandblasted and burnished;
- Grinding on the adaptor profile, with rebores CNC supplied with positioning device and indicator in process.

### FRENCH CARACTÉRISTIQUES

- Fabriquées en acier de cémentation et d'alliage;
- Cémentées, Trempées, revenues, décapées et brunies;
- Elles sont rectifiées sur tout le profil de fixation et l'emplacement du mandrin avec des rectifications à CNC pourvues de positionneur e mesureur in process.

### GERMAN TECHNISCHE DATEN

- Sie werden aus Einsatzstahl gemacht mit legiert.
- Sie werden gestählt, angelassen, sandgestrahlt und brüniert;
- Sie werden auf dem ganzen Anzugsprofil und Spannfuttersitz mit CNC Schleifmaschinen geschliffen, die mit Stell- und Messgerät versehen sind.

## ISTRUZIONI E PRECAUZIONI / INSTRUCTIONS AND PRECAUTIONS INSTRUCTIONS ET PRÉCAUTIONS / ANLEITUNGEN UND VORSICHTSMASSNAHMEN

### ITALIANO ISTRUZIONI E PRECAUZIONI

- Per il corretto montaggio si consiglia di utilizzare colla frena filetti.
- È pericoloso usare codoli di aggancio che non garantiscono la qualità del materiale e del trattamento termico; la rottura di un codolo rovina il cono della macchina ed è pericoloso per gli operatori.
- Gli sforzi di chiusura dei codoli sono i seguenti:  
M12: 2 ÷ 2,4 Kgm - M16: 6 ÷ 7,8 Kgm - M24: 20 ÷ 24 Kgm

### ENGLISH INSTRUCTIONS AND PRECAUTIONS

- For correct fitting we recommend the use of a thread locking adhesive.
- It is dangerous to use pull studs where the quality of the materials and heat treatment are not guaranteed. The breaking of a pull stud ruins the cone of the machine and is dangerous for the operator.
- Pull studs should be torqued as follows:  
M12: 2 ÷ 2,4 Kgm - M16: 6 ÷ 7,8 Kgm - M24: 20 ÷ 24 Kgm

### FRENCH INSTRUCTIONS ET PRÉCAUTIONS D'UTILISATION

- Pour un correct assemblage il est conseillé d'utiliser de la colle freine-filets.
- Il est dangereux d'utiliser des tirettes qu'ils ne garantissent pas la qualité du matériel et du traitement thermique; l'endommagement d'un tirette abîme le cône de la machine et devient dangereux pour les opérateurs.
- Les efforts de fermeture des tirettes sont les suivants:  
M12: 2 ÷ 2,4 Kgm - M16: 6 ÷ 7,8 Kgm - M24: 20 ÷ 24 Kgm

### GERMAN ANLEITUNGEN UND VORSICHTSMASSNAHMEN

- Für eine korrekte Montage empfiehlt man ein Gewindbremser Klebstoff.
- Es ist gefährlich Anzugsbolzen zu verwenden, die eine Materialqualität und eine thermische Behandlung nicht garantieren; der Bruch eines Anzugsbolzen beschädigt den Maschinenkonus und ist gefährlich für die Arbeiter.
- Die Verschlusskräfte der Anzugsbolzen sind folgende:  
M12: 2 ÷ 2,4 Kgm - M16: 6 ÷ 7,8 Kgm - M24: 20 ÷ 24 Kgm

## CARATTERISTICHE COSTRUTTIVE / MANUFACTURING SPECIFICATIONS / CARACTÉRISTIQUES CONSTRUCTIVES / BAULICHE DATEN

### ITALIANO CARATTERISTICHE COSTRUTTIVE

- Costruiti con acciaio speciale con elevata resistenza agli urti.
- Cementati, temprati, rinvenuti con durezza HRC 56÷60; filettatura protetta dalla cementazione, durezza HRC 45.
- Superficie funzionali rettificate.
- Forniti con O-ring di tenuta sulla guida.

### ENGLISH MANUFACTURING SPECIFICATIONS

- Manufactured with special steel with maximum impact strength.
- Casehardened and tempered to HRC 56 ÷ 60; the thread is soft HRC 45.
- Functional surfaces completely ground.
- Supplied with O-ring on the guide.

### FRENCH CARACTÉRISTIQUES CONSTRUCTIVES

- Les tirettes sont construits avec acier spécial avec résistance élevée aux chocs.
- Cementés, trempés, revenu avec dureté HRC 56÷60; filetage protégé par la cimentation, dureté HRC45.
- Les Surfaces fonctionnelles sont rectifiées.
- Les tirettes sont fournis avec joint-torique de tenue sur le guide.

### GERMAN BAULICHE DATEN

- Sie werden aus Sonderstahl gebaut mit hoher Stoßfestigkeit;
- Einsatzgehärtet, gehärtet, angelassen mit Härte HRC56+60; Gewinde geschützt vom Einsatzhärten, Härte HRC45
- Funktionelle Oberflächen geschliffen;
- Die O-ringe auf der Führung werden mitgeliefert

# CODOLI DI AGGANCIO SPECIALI A RICHIESTA

## SPECIAL PULL STUDS AVAILABLE ON REQUEST

## LES TIRANTS SPÉCIAUX, SUR DEMANDE SPÉCIFIQUE

## SONDERTEILE GEMÄSS ZEICHNUNG

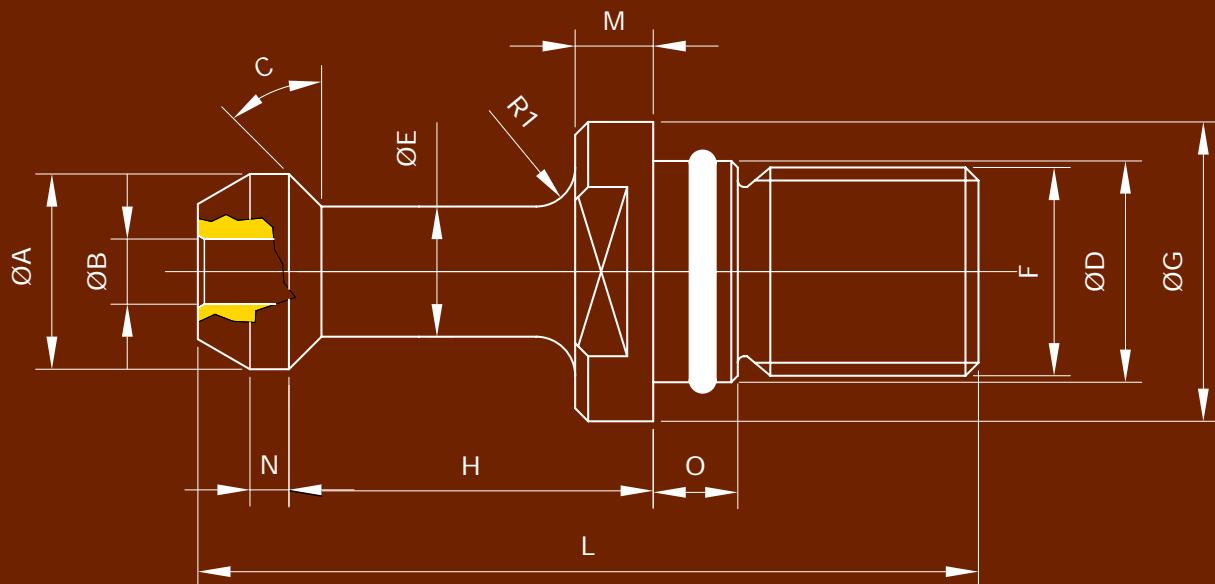

Per codoli di aggancio speciali, non standard, utilizzare la seguente tabella per specificare le quote mancanti.

For a non standard pull stud, add the dimensions required to the sketch and forward to Serinex

Souligner, si possible, aussi les dimensions du siège de la clé sur la flange. Dans la demande reporter, si possible, le type de machine où le tirette est assemblé.

Für die speziellen Anzugsbolzen, also nicht standard, bitte folgende Tabelle für fehlende Masse benutzen.

F	$\emptyset D$	$\emptyset G$	$\emptyset E$	$\emptyset A$	$\emptyset B$	H	L	N	O	M	C	R1

## NOTE / NOTE / NOTE / NOTE

La quota angolare C, in alcuni casi, è sostituita da una raggiatura R, da indicare nella richiesta. Evidenziare, se possibile, anche le dimensioni della sede chiave sulla flangia. Nella richiesta riportare, se possibile, il tipo di macchina sulla quale il tirante viene montato

The angle "C", in some cases, is replaced by radius "R". Please specify with your request. If possible highlight the dimension of the tool seat on the flange. Please include, if possible, the machine type where the pull stud will be used.

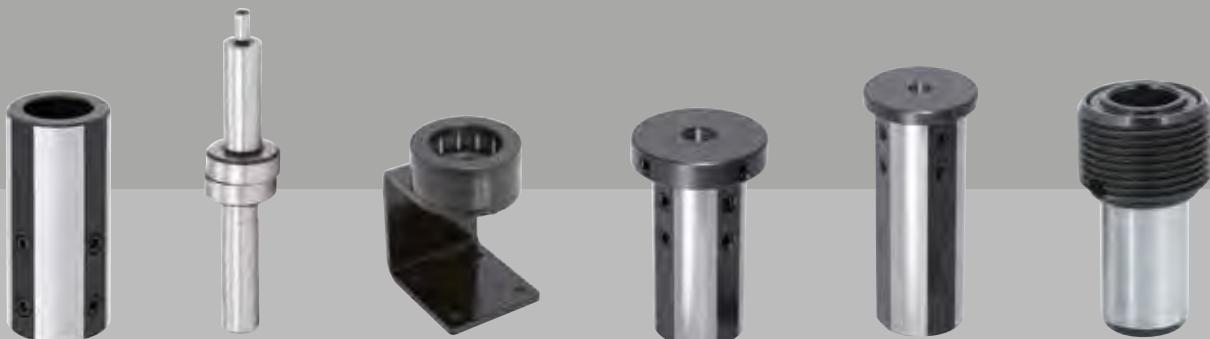

Souligner, si possible, aussi les dimensions du siège de la clé sur la flange. Dans la demande reporter, si possible, le type de machine où le tirette est assemblé.

Das Winkelmaß C in einigen Fällen, besteht aus einem Radius R; dies muss man bei Anfrage angeben. Wenn möglich, auch die Abmessung des Schlüsselsitzes auf der Flansche angeben. Bei anfrage, wenn möglich auch den Maschinentyp angeben auf welcher der Anzugsbolzen montiert wird

# ACCESSORI ACCESSORIES

## ACCESSORI - INTRODUZIONE

In completamento alla produzione di pinze, ghiere, mandrini e codoli, SERINEX produce una serie di accessori:

- SMONTACONI
- BUSSOLE DI RIDUZIONE ( boccole di riduzione )
- TASTATORE MECCANICO
- RACCORDI HSK e CHIAVI PER RACCORDI
- ANELLI e TASSELLI DI TRASCINAMENTO
- CHIAVI PER GHIERE
- CHIAVI A SETTORE
- CHIAVI DINAMOMETRICHE
- RIDUZIONI A CONO MORSE

Tutti garantiti dallo standard di qualità Serinex.

Questi particolari sono interamente eseguiti nella nostra moderna unità produttiva di Oggiono, situato a breve distanza da Lecco, in un comparto di oltre 7000 mq. dotato di un ampio parco macchine di ultima generazione

## ACCESSORIES - INTRODUCTION

*To complete the production of collets, nuts, toolholders and pull studs, SERINEX produces a series of accessories:*

- INDEXABLE ASSEMBLY UNIVERSAL SUPPORT AND CLAMPING DEVICE ROLLING BEARING
- TOOLHOLDERS BUSHING
- FLOATING PRECISION CENTERING DEVICE
- HSK- COOLING TUBE AND HSK-COOLING TUBE WRENCHES
- RINGS AND DRIVING KEY
- WRENCHES FOR NUTS
- HOOK SPANNER WRENCHES
- DYNAMOMETRIC WRENCHES
- MORSE TAPER SLEEVES

*All guaranteed by Serinex quality standard*

*These items are entirely performed in our modern division in Oggiono, not far from Lecco, in a place of more than 7000 mq. , supplied with a wide rolling stock with a high daily production.*

## ATTENZIONE / ATTENTION

DATI TECNICI ED IMMAGINI SONO INDICATIVI. SERINEX SI RISERVA DI APPORTARE AGGIORNAMENTI IN QUALSIASI MOMENTO E SENZA OBBLIGO DI PREAVVISO.

# ACCESSOIRES ZUBEHÖR

## ACCESSOIRES - INTRODUCTION

En complément à la production des pinces, d'écrous, des mandrins et des tirettes, nous produisons une série d'accessoires:

- DEMONTE-CONES
- DOUILLES DE REDUCTIONS
- PINNULES MECANIQUES
- RACCORDES DE ARROSAGE - HSK
- CLÉS POUR ÉCROUS
- CLÉS À CROCHET
- CLÉS DINAMOMETRIQUES
- RÉDUCTIONS À CÔNE MORSE

tous garantis par le standard de qualité Serinex.

Tous ces articles sont entièrement produites au sein de notre unité moderne de production d'Annone Brianza, sise à proximité de Lecco, dans un compartiment de plus de 7000 m<sup>2</sup>, doté d'un large parc de machines avec une production journalière élevée.

---

## ZUBEHÖR - EINFÜHRUNG

Neben unserer Produktion von Spannzangen, Muttern, Spannfuttern und Anzugsbolzen, stellen wir eine Vielfalt von zusätzlichem Zubehör her, die von dem Serinex Qualitätsstandard garantiert werden:

- MONTAGEUNTERSTÜTZUNGEN
- REDUZIERHÜLSEN - REDUZIERUNGEN
- MECHANISCHE MESSTASTER
- HSK ANSCHLÜSSE UND ANSCHLUSS - SCHLÜSSEL
- MITNEHMERRINGE UND -DÜBEL
- MUTTERNSCHLÜSSEL
- HAKENSCHLÜSSEL
- ZWISCHENHULSEN

Diese Zubehörsind alle völlig bei unserem modernen Produktionsbetrieb in Oggiono hergestellt, der sich in einer Zubehöre Abteilung von mehr als 7000 Quadratmetern in der Umgebung von Lecco befindet und über einen breiten Maschinenpark mit einer hohen täglichen Produktion ausgestattet ist

## CARATTERISTICHE DEI SUPPORTI DI MONTAGGIO

### FEATURES OF INDEXABLE SUPPORT

### CARACTERISTIQUES TECHNIQUES DES DEMONTE CONE

### MERKMALE DER MONTAGEHALTERUNGEN

#### ITALIANO ● SUPPORTO DI MONTAGGIO ORIENTABILE UNIVERSALE

Consentono l'orientamento dei portautensili sugli assi verticali ed orizzontali per facilitare il montaggio degli utensili. Il cono dei portautensili è protetto da due anelli O-ring in NBR opportunamente posizionati.

Corpo in acciaio, leve di manovra in materiale termoplastico.

Sono fissati con 4 viti al banco di lavoro.

I supporti di montaggio devono essere fissati al banco di lavoro o al carrello porta utensili.

La testa portautensile è orientabile in verticale e orizzontale.

1. vite d'arresto per mandrini HSK63A / HSK100A / BT40 / BT50 / SK40 / SK50 DIN69871 / ISO40 DIN2080
2. vite di sicurezza per la flangia BT40 / BT50 / SK40 / ISO50 DIN 2080
3. vite di sicurezza per la flangia SK40 / SK50 DIN 69871

#### FRENCH ● SUPPORT DE MONTAGE ORIENTABLE UNIVERSEL

Ils permettent l'orientation des porte-outils sur les axes verticales et horizontales pour faciliter le montage des outils. Le cône des porte-outils est protégé par deux joints toriques en NBR convenablement positionnés. Le corps en Acier, les leviers de manœuvre en matériel thermoplastique. Il sont fixés par 4 vis à la table de montage Les supports de montage doivent être fixés à la table de montage ou au chariot porte-outil.

La tête du porte-outil est orientable en verticale et horizontale.

1. Vis d'arrêt pour les mandrins HSK63A / HSK100A / BT40 / BT50 / SK40 DIN69871 / SK50 DIN69871 / ISO40 DIN2080
2. Vis de sécurité pour la flange BT40 / BT50 / SK40 DIN69871 / ISO50 DIN 2080
3. Vis de sécurité pour la flange SK40 DIN69871 / SK50 DIN 69871

#### ENGLISH ● INDEXABLE ASSEMBLY UNIVERSAL SUPPORT

Head fixture can be set in two position, vertical and horizontal, for easy access to the cutting tool. The tapers protection is granted by two special NBR O-ring.

Body in steel, operating levers in thermoplastic material.

Can be mounted on work table with four screws.

The mounting fixtures must be fixed to a bench or to a tool cart. Head fixture can be set in vertical and horizontal position.

1. set screw for tools-shank HSK63A / HSK100A / BT40 / BT50 / SK40 / SK50 DIN69871 / ISO40 DIN2080
2. safety screw for "V" flange BT40 / BT50 / SK40 / ISO50 DIN2080
3. safatry screw for "V" flange SK40 / SK50 DIN 69871

#### GERMAN ● UNIVERSAL SCHWANKENDE MONTAGEHALTER

Diese ermöglichen die Schwankung der Werkzeughalter auf den senkrechten und waagrechten Achsen und erleichtern die Montage der Werzeuge.

Der Konus der Werkzeughalter ist mit zwei O-Ringen aus NBR geschützt.

Stahlkörper, Schaltunghebel aus thermoplastik, und sind mit 4 Schrauben an der Werkbank befestigt. Die Montagehalter müssen an der Werkbank oder am Werkzeugwagen befestigt werden.

Der Kopf des Werkzeughalters ist schwenkbar senkrecht und waagrecht.

1. Klemmschraube für Spannfutter HSK63A / 100A / BT40 / BT50 / SK40 / SK50 DIN69871 / ISO40 DIN2080
2. Sicherheitsschraube für die Flansche BT40 / BT50 / ISO 40 DIN 2080 / ISO50 DIN 2080
3. Sicherheitsschraube für die Flansche SK40 / SK50 DIN 69871

## MECCANICO UNIVERSALE - INDEXABLE ASSEMBLY UNIVERSAL

Cod.	TYPE	D	BASE	H	ADATTO PER / SUITABLE FOR
PV00141	SMONTACONO 30 meccanico universale <i>Indexable Assembly Univ. support 30</i>	50	150	160	SK30 DIN69871 - ISO 30 DIN2080 - BT30 - CAT30 - HSK50A - CAPTO C5

## CARATTERISTICHE DEI SUPPORTI DI MONTAGGIO

### FEATURES OF INDEXABLE SUPPORT

### CARACTERISTIQUES TECHNIQUES DES DEMONTE CONE

### MERKMALE DER MONTAGEHALTERUNGEN

#### SUPPORTO DI MONTAGGIO A RULLI

Una speciale gabbia a rullini bidirezionale blocca il portautensile sulla flangia per consentire il montaggio e lo smontaggio degli utensili e degli accessori sul corpo mandrino. È garantita la massima protezione (per mancanza di contatto) del cono mandrino.

#### CLAMPING DEVICE WITH ROLLING BEARING

A special bidirectional roller bearing locks the toolholder on the flange to allow the assembly and the disassembly of tools and accessories from the toolholder. It's guarantee the maximum protection of the toolholder cone (because the contact surface of the toolholder is only the flange)

#### SUPPORT DE MONTAGE A ROULEAUX

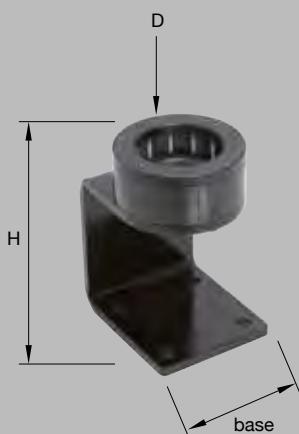

Une cage spéciale à rouleaux bidirectionnelle bloque le porte-outil sur la flange pour permettre le montage et le démontage des outils et des accessoires sur le bloc mandrin. Il est garanti la protection maximale (pour éviter le contact) du cône mandrin.

#### MONTAGEHALTER AUF ROLLEN

Ein spezieller Rollenkäfig, zweiseitig gerichtet, blockiert den Werkzeughalter auf die Flansche. Er ermöglicht die Montage und die Abmontage der Werkzeuge und der Zubehöre auf dem Spannfutterkörper.

Da kein kontakt besteht, hat man einen max. Schutz des Spannfutterkonus.

## CARATTERISTICHE DEI SUPPORTI DI MONTAGGIO

### FEATURES OF INDEXABLE SUPPORT

### CARACTERISTIQUES TECHNIQUES DES DEMONTE CONE

### MERKMALE DER MONTAGEHALTERUNGEN

#### SUPPORTO MONTAGGIO PER MANDRINI CILINDRICI

- Permettono il montaggio e lo smontaggio dei mandrini cilindrici di diversi diametri e lunghezze.
- Può essere fissato al banco di lavoro grazie a quattro fori sulla base orizzontale.
- Per una corretta introduzione del mandrino cilindrico, si consiglia una piccola rotazione: oraria o antioraria.

#### DEMONTE POUR CYLINDRICAL MANDRIN

- Ces demonte-cones permettent l'assemblage et le démontage des mandrins cylindriques, de différents diamètres et longueurs.
- Cet article peut être fixé au banc de travail grâce à quatre trous sur la base horizontale.
- Pour une correcte introduction du mandrin cylindrique, il est conseillé une petite rotation: horaire ou anti-horaire.

#### INDEXABLE SUPPORT FOR A CYLINDRICAL TOOL HOLDERS

- These items allow the assembly and disassembly of cylindrical tool holders, of different diameters and lengths.  
*It can be fixed to the workbench with four holes on the horizontal base*
- For a proper introduction of the tool holder, we recommended a small rotation: clockwise or counterclockwise

#### MONTAGEHALTER FUER ZYLINDRISCHE SPANNFUTTER

- Diese montagehalter ermöglichen die Montage und Demontage des zylindrischen spannfutter.
- Diese Montagehalterung kann an der Werkbank durch die vier Löcher im Boden befestigt werden.
- Fuer eine korrekte einfuehrung des zylindrische spannfutter, ist es ratsam eine kleine links-und rechtsdrehung zu machen.

# LA TECNOLOGIA DEL CALETTAMENTO A CALDO

Il calettamento termico è un sistema di serraggio che sfrutta la dilatazione termica del portautensile, permettendo così l'inserimento dell'utensile in metallo duro o in HSS nel foro dello stesso. Attraverso la macchina a calettamento, viene riscaldato il portautensile, permettendo così una dilatazione del foro del mandrino. Una volta inserito l'utensile, attraverso l'apposita unità di refrigerazione, il mandrino viene raffreddato e riportato alle sue dimensioni originarie, bloccando così in modo stabile e sicuro l'utensile.

I mandrini a calettamento termico permettono di risolvere quelle che sono le problematiche legate alla mancanza di precisione nelle lavorazioni ad alta velocità; questo avviene grazie al particolare tipo di serraggio che si viene a creare attraverso il sistema di riscaldamento e raffreddamento del portautensile. Il serraggio tramite calettamento, infatti, garantisce una maggior precisione sulla concentricità dell'utensile, oltre che una maggior forza di chiusura dello stesso. Altra importante peculiarità di questa tipologia di mandrini è la possibilità, rispetto ad altre varietà di portautensili, di poter lavorare in spazi ridotti, grazie a ingombri minimi, riuscendo comunque a mantenere una forza di serraggio notevole. Caratteristiche indispensabili che nessun altro sistema di serraggio riesce a garantire.

# MODELLI MACCHINA A CALETTAMENTO START.2

## Dotata di bobina intelligente:

riconosce il diametro dell'utensile che sta calettando e ne auto-tara il tempo di riscaldamento.

## Alimentazione elettrica:

3x380 / 480 V - 16 A

## Potenza:

14 kW

## Dimensioni:

255 mm x 490mm x 755mm

## Peso:

19 Kg ( senza accessori aggiuntivi )

## Equipaggiamento standard:

- Anello induttore dal Ø 6 al Ø 12
- Anello induttore dal Ø 14 al Ø 20
- Paio di guanti in kevlar
- Pulsantiera di comando

Permette di calettare utensili dal diametro 2 al diametro 40 in pochi secondi.

E' possibile calettare utensili con i taglienti posti ad una distanza maggiore tra di loro rispetto al diametro dell'utensile, grazie agli anelli induttori aperti.

Può essere collocata in un banco di lavoro fisso oppure su un carrello.

# UNITA' DI RAFFREDDAMENTO FG500.1150

Unità di raffreddamento ad aria, con alimentazione pneumatica e completa di filtro e regolatore di pressione. Riesce a raffreddare il mandrino in breve tempo, creando una notevole forza di chiusura.

## Dimensioni:

250 mm x 190 mm x 615 mm

## Peso:

5 Kg

## Aria compressa supportata:

4-6 bars

## Equipaggiamento standard:

- Supporto di raffreddamento dal Ø 6 al Ø 12
- Supporto di raffreddamento dal Ø 14 al Ø 20

# MODELLO MACCHINA A CALETTAMENTO FI-6

## Dotata di bobina intelligente:

riconosce il diametro dell'utensile che sta calettando e ne auto-tara il tempo di riscaldamento.

## Alimentazione elettrica:

3x380 / 480 V - 16 A

## Potenza:

14 kW

## Dimensioni:

785 mm x 490mm x 855mm

## Peso:

65 Kg ( senza accessori aggiuntivi )

## Equipaggiamento standard:

- Anello induttore dal Ø 2 al Ø 5
- Anello induttore dal Ø 6 al Ø 12
- Anello induttore dal Ø 14 al Ø 20
- Anello induttore dal Ø 25 al Ø 32
  - Paio di guanti in kevlar
  - Pulsantiera di comando
- Due unità di raffreddamento incorporate
- Due supporti di raffreddamento dal Ø 2 al Ø 5
- Due supporti di raffreddamento dal Ø 6 al Ø 12
- Due supporti di raffreddamento dal Ø 14 al Ø 20
- Due supporti di raffreddamento dal Ø 25 al Ø 32

Completa di due unità di raffreddamento incorporate che permettono di raffreddare, in pochi minuti, utensili dal diametro 2 al diametro 40 - anche se dello stesso diametro.  
Gestione del ciclo di calettamento e di raffreddamento senza toccare il portautensile

Può essere collocata su un banco di lavoro

# SCEGLI IL TUO EQUIPAGGIAMENTO PERSONALIZZATO

# PERFORMANCE UTENSILE

# BILANCIATURA

## PRINCIPI DI BILANCIATURA

Lo squilibrio statico ( $U$ , [g.mm]) determina una differenza di posizione ( $e$ , [mm]) tra il centro di gravità e l'asse di rotazione del portautensile. Questo squilibrio genera una forza centrifuga che ha effetti negativi, sia sulla macchina utensile, sia sugli utensili stessi.

$$U = e \times M \text{ portautensile}$$

Dove :  $U$  = squilibrio statico in gr/mm  
 $e$  = bilanciamento specifico residuo ammissibile [g.mm/kg]  
 $M$  = massa portautensile in Kg

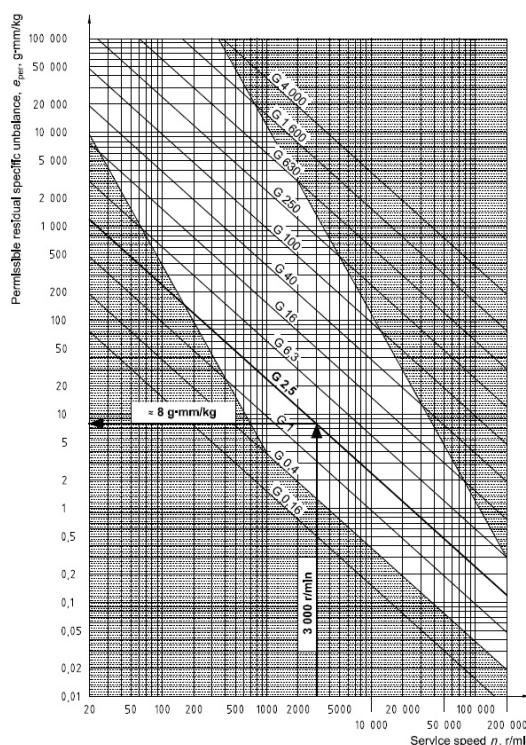

$$F = U \times \omega^2 \times 10^6$$

Dove :  $F$  = forza [N]  
 $U$  = squilibrio [g.mm]  
 $\omega$  = velocità di rotazione in rad/s

Lo squilibrio viene compensato mediante l'aggiunta o la rimozione della massa. Lo squilibrio dinamico comporta una differenza di posizione tra l'asse principale e l'asse di rotazione che genera vibrazioni dannose. La normativa ISO1940 (relativa alla bilanciatura) determina lo squilibrio ammissibile ( $U$ , [g.mm]) calcolabile come:

$$U_{\text{amm}}: \frac{1000 \times G \times M}{N}$$

Dove :  $G$  = grado di equilibratura [mm/s]  
 $M$  = massa [Kg]  
 $N$  = velocità di rotazione [rad/s] =  $\frac{\pi \times n}{30}$   
 $n$  = velocità di rotazione [giri/min]

## VANTAGGI DELLA BILANCIATURA

- Vibrazioni ridotte durante le lavorazioni.
- Migliore rugosità del pezzo lavorato.
- Aumento della vita dell'inserto, punta o fresa

Bilanciando il portautensile si avrà una maggior stabilità durante la lavorazione, grazie alla corretta distribuzione del peso. Questa è la motivazione per la quale preferiamo bilanciare i nostri portautensili.

Nel grafico riportato, viene indicata la modalità di rilevamento del valore  $e$ . Sull'asse X è espressa la velocità di rotazione del mandrino, indicata con  $n$ . Sull'asse Y è indicato lo sbilanciamento specifico residuo ammissibile, e per g.mm/kg.

## Il grafico si utilizza nella seguente modalità:

- 1 . Selezionare, sull'asse X, il numero di giri che il vostro mandrino dovrà utilizzare durante la lavorazione. Esempio: 3000 r/min
2. Con una linea retta, salire in verticale nel grafico, fino ad intersecare una delle rette oblique indicanti il grado di tolleranza desiderato. Solitamente le tolleranze più utilizzate sono G6,3 e G2,5 (nell'esempio riportato è stata selezionata la tolleranza G2,5)
3. Dal punto di intersezione tra la retta verticale e quella obliqua, tracciare una retta orizzontale e rilevare il valore riportato sull'asse Y.
- 4 . Moltiplicare il valore riscontrato sull'asse Y per il peso del mandrino in Kg.
5. Il risultato è lo squilibrio ammissibile per il vostro mandrino e per la vostra lavorazione.
